Stampede Promises Big Event

Preparations Near Complete

Everything is rounding into readiness for the Raymond Stampede and Race Meet to be held next Tuesday and Wednesday. Each day will see at least 70 thrilling events.

Fifty trained buckers are being rounded up by Ray Knight's men, while Meek's Bros. are herding a hundred steers and calves into the corrals.

Race horses from all points of the compass will be seen in action. They will include the Watt string from Clarsholm, Spud Murphy's string and the Powell horses from Montana, together with a score of thoroughbreds from Cardston, the Blood reserve and Raymond.

Already entries are being received for bronco riding, steer riding and calf roping.

Minneke, Montana's roping ace will compete in a challenge match with Bruised Head Canada's champion for a side bet of \$100.

A feature of the stampede will be the wild steer, Max Romep, which has never been successfully ridden with the saddle. It is an everyday occurrence to see a man throw the bull but now the tables will be turned and the bull will throw the man.

The stampede committee challenges any cowboy in the world to ride Romeo across the line with a saddle.

Another feature which will furnish the last word in thrills will be the wild horse race. This event alone is always worth the price of admission and is more difficult to watch than a five ring circus.

Then the Roman race, a thing of grace, beauty and speed, never fails to be a big drawing card at Raymond's wild west show.

A long list of horse races is on the card for both days. Lovers of the sport will see much of it.

Ray Knight is returning from Salt Lake City for the stampede and will join in the sport of calf roping. Because of his injured leg he will be allowed an assistant to tie his calf.

For the kids there will be the merry-go-round. A few dimes will give them the time of their lives. A large number of other concessionists have already booked their frontage.

As night falls the scene both days will shift to the Opera House where the peppy music of the Premier orchestra will hold the dancing crowd until past midnight.

Everything possible is being done to make this the biggest and best stampede of Raymond's history.

Seen and Heard

L. D. King brushing up his 5-gallon hat in preparation for the Stampede.

Constable VanOrman NOT picking bouquets in a sow thistle patch.

Stan Ellis "exceeding the speed limit" with 1500 pounds in a Ford truck on rough roads.

O. H. Snow sharpening up his pencil to issue tax notices.

Albert Hicken's "Stodie" throwing tons of mud coming back from the circus.

Dr. Astrof handing in his resignation as health officer.

Ed. Hawk taking over the job of weed inspector.

Lorne Larson buzzing about looking over weed patches.

Constable VanOrman's horses retreating from Memorial Park until the tennis court is fenced.

T. W. Meldrum, Paul Dahl and W. Redd constructing drains and then applying for permission.

News Notes

Mr. and Mrs. George Mangan, accompanied by Mrs. A. Corless left here last Sunday en route to Roseburg, Oregon.

C. W. Card returned last Monday via Glacier Park from Portland.

News Notes

Can a man hold two horses pulling in opposite directions? It will be done at the Raymond Stampede. Chas. Tittsworth will do the strong man act.

Ray Knight who has been in Salt Lake City will be here to manage his Stampede and to do his stuff. As Ray has a game leg he will have an assistant to tie his calves while he handles the loop.

With a bumper crop beginning to ripen, the spirit of the public is quite in tune to enjoy Raymond's two big days next Tuesday and Wednesday.

One of the fill-in acts at the Ringling circus last Wednesday was a bunch of clowns in an imitation fire scene. Great flames shot up from the fake house. Clown residents appeared on the walls screaming for help before tumbling into the net below. A lady clown threw her dummy baby back into the flames and leaped to safety. An explosion blew a hole clear to the top of the tent from where it fell with a sickening thud. A miniature fire engine all of two feet in height, roared up to the rescue. It squirted a thin stream of water fully 15 feet high. The Recorder respectfully suggests that the town council negotiate with the Ringling circus with a view to trading our fire equipment for the little comedy engine, with possibly something to boot from the town.

"Nothing Can Stop Us."

Canada has been honored in this year of its Diamond Jubilee by another visit from the Prince of Wales. On this occasion, however, he is accompanied by his brother, Prince George, and by the Right Honorable Stanley Baldwin, Prime Minister of Great Britain.

The significance of this visit will not be lost upon the people of Canada, nor, in fact, upon the British Empire as a whole. The ease with which the people of Canada and the British Isles can exchange visits nowadays is resulting in a more intimate knowledge of each other and in developing a community of interest quite lacking not so many years ago. Now it is almost as easy for the people of Canada and Britain to visit each other as it is for Canadians in the Maritime Provinces to visit their fellow citizens in British Columbia.

The fact is that being made known to the world that Canada occupies a strategic position in the British Commonwealth of Nations, its geographical location in the Empire, constituting it the main highway between the Continent and the Orient, must inevitably result in this Dominion being the real centre of the Empire in the not so very distant future. And the development of transoceanic travel by air will only serve to emphasize Canada's important place in the Empire.

Thus, for the first time in history, a Prime Minister of Great Britain is able during his tenure of office to leave Britain and make an official visit to one of the overseas Dominions. He could not possibly spare the time to visit any of the other Dominions. It is an epoch-making event.

It is apparent that Mr. Baldwin, himself, is cognizant of what the future lies in store. In an address before the Montreal Canadian Club shortly after his arrival in this Dominion Mr. Baldwin spoke in such optimistic terms of Canada's future possibilities and greatness that, voiced by a native Canadian, would have left the latter open to possible ridicule and criticism as being bombastic.

Mr. Baldwin sees no limit to the greatness of Canada's future. "Nothing can stop you," he declared. "Canada, he went on to say, must progress with the world's progress with the result that some day 'Canada may be the greatest nation in the world.'"

Sixty years of Confederation have proven to Canadians and to the world what can be accomplished, and have established the untold possibilities of the Dominion in all those qualities and resources which go to make a nation great. Another sixty years may easily see Canada with a larger population than the British Isles, with manufacturing being carried on with a magnitude as yet undreamed of, and surpassing in output the great industries of the old land, while at the same time supplying in even greater degree than today the food requirements of the world.

Canada is only now getting into its stride. It is just at its feet, and on the eve of a development and expansion in all the major activities of the world which will establish a new world's record in national growth. Canadian foundations have been well and truly laid. They are strong enough upon which to erect a magnificent structure, and it only remains for the Canadian people to realize its possibilities and devote themselves with patriotic devotion and untiring energy to the inspiring task before them.

The days of pessimism are past. There never was any real cause for them, but this Jubilee year has, there is reason to believe, finally convinced the people of the Dominion of this fact. There has been a great awakening of our people, and a new national spirit has been evoked, a new confidence born, and a pride and courage developed which in a comparatively few years will work a veritable revolution in the growth of this Dominion.

Canadians will do well to keep ever in mind the slogan of the National Diamond Jubilee Committee "Canada Our Country," and to accept as their watchword the words given to them by Premier Baldwin, "Nothing Can Stop Us." In making Canada great and prosperous they will be rendering the most possible service to the Empire as a whole and confer benefits upon the world at large, because, above all things, the Canadians are a home-loving, peace-loving people. They have the true conception of the new International which believes in the advancement of all peoples as the true policy of a better world.

Sheep Ranch At Invermere

A movement is on foot to develop a large sheep-ranching industry in the territory about 30 miles south of Invermere, B.C., contiguous to Pindley Creek and Canal Flat. A wide-open, undisturbed range lies in that part which since the cattle industry has flagged, has rarely been needed except by wild horses common to that part.

Saskatchewan Cow Makes Record

G. E. Day, Secretary Dominion Southern Breeders' Association, Calgary, Ont., reports that Darlington Mable (201986) a cow owned by P. S. Cooper, Gravelbourg, Sask., has just completed a 365-day record of 5,617 lb. of milk and 219 lbs. of butterfat.

Bullies of other people are always doubly clear to us.

Creates New Walking Record

Jean Linder, of Switzerland, walking the 215 miles from Paris to Strasbourg in an elapsed time of 72 hours, one minute, has created what is claimed as a record for long distance road walking. His actual walking time was 66 hours, or an average of nearly five miles an hour. He beat 45 other walkers, finishing three hours ahead of his nearest competitor.

Alberta Coal For B.C.

Mr. George B. Pratt, fuel engineer for the Alberta Government, reports that there are strong possibilities of establishing a coal factory market for Alberta coal on the Pacific coast due, to some extent, to the creation of bunkering facilities at Vancouver.

If a man is too lazy to think for himself he should get married.

Unique Device Patented

Rollers At Railroad Crossing Will Prevent Accidents

As a means for preventing automobile accidents at railroad crossings, an Ohio inventor has patented a roller device which has proved effective under tests, says Popular Mechanics Magazine. There are two sets of rollers, each children feet long, installed in the highway near the rail approach. They revolve only one way and when the automobile strikes them, as a train is approaching, they turn, keeping the car from going forward. When the train passes, a switch locks the rollers so that the auto can proceed.

Why Hobble Along On Sore Corns?

Don't cut corns with an old razor. Infection followed often by death may result from cutting corns with an infected knife. Quick safe relief comes from using Putnam's Corn Extractor. If afflicted with corns, calluses or sore footpads, use "Putnam's"—it's reliable and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use Putnam's Painless Corn Extractor. 25c. at all dealers.

An Overcrowded Country

Population Of England Is 700 To The Square Mile

It must be confessed that we dwell in an overcrowded country. The population of England, apart from Wales and Scotland, is more than 700 to the square mile. We are four times as crowded as India and nearly three times as congested as China. We are twice as crowded as Germany or Italy, and nearly four times as France. Nevertheless, since 1910, we have built some 800,000 houses at a capital cost to the public purse estimated to be about £117,000,000. And still State subsidies are being given towards unremunerable housing schemes, which all our suburbs and encourage builders to erect ugly villas along our country roads.—B. S. Townroe Edinburgh Review.

THE BEST MEDICINE SHE EVER USED

Dr. Williams' Pink Pills Highly Praised By A Quebec Lady

Mrs. David Logan, Thetford Mines, Que., gives unstated praise to Dr. Williams' Pink Pills for the good they have done in her family. Mrs. Logan says: "I have been a user of Dr. Williams' Pink Pills for many years, as occasion required, and have always found them a most reliable medicine. My husband, who was recovering from an attack of typhoid fever, and was in a very weak condition, took the pills, and through them gained health and strength. My daughter was in a run-down condition, and was forced to discontinue work. Again Dr. Williams' Pink Pills were resorted to and she was soon restored to excellent health. Then my eldest boy had an operation performed for adenoids, which left him in a weakened condition. Once more Dr. Williams' Pink Pills were tried, and he was soon in excellent health. So I can truly say that more than satisfaction has been obtained by the use of this medicine. The pills have done more good in my home than hundreds of dollars worth of more expensive medicine."

Dr. Williams' Pink Pills assist digestion, correct the lassitude, the paleness of the face, slaky nerves and the pallor of the face and lips that are the results of thin, impure blood.

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Movies Filmed In Rockies

Spectacular Stunts Of Aviation Over Lake Louise

The most spectacular event ever attempted in the Canadian Rockies and one which attracted every guest to the front lawn of the Chateau Lake Louise, was successfully carried out by two Canadians, ex-Royal Air Force officers, W. H. Williams and E. C. Bigelow, who for half an hour performed a number of flying stunts over Lake Louise and the Chateau. Zooming down on the lake and dropping from the machine in parachutes were the features of the exhibition which was staged by the Fox Film Company in connection with their film, "Typhoon." This picture, which stars Olive Borden and is directed by Jack Hyams, is now being made in Alberta.

Encourage Vegetarian Weddings

"Vegetarian weddings are being encouraged by the French Society of Vegetarians. They have organized a series of functions where young lovers of vegetables can start their courtships. Dismotes may be attracted to each other by some of the benefits of this movement, but the dinner table is likely to become a battle ground if there be too great a difference in tastes.

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Druggists and General Stores—10c and 25c per package.

Eight Ocean Airmen Brought Together

Aviators Entertained At Breakfast By Mayor Of Boston

For the first time since the Atlantic and Pacific flights which made them famous, eight of America's ocean-spinning aviators were brought together.

At a breakfast tendered by Mayor Malcolm Nichols at the Hotel Bellevue, Boston, Colonel Charles A. Lindbergh, who was given a tumultuous greeting to Boston, was joined by Lieutenants Lester J. Maitland and Albert E. Hegenberger, Pacific fliers, Commander Richard E. Byrd and his crew on the flight to France, Lieutenant George D. Noville, Bert Acosta, and Herat Balchen, and by Clarence D. Chamberlin, who flew to Germany.

Mrs. Chamberlin was the only woman present. She sat next to her husband, Porter Adams, president of the National Aeronautical Association, was another guest.

For Scalds or Burns. Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and adds a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Mr. Amery's Empire Tour

Will Visit Canada In January Of Next Year

Mr. Amery is now embarked upon his tour to the dominions, having sailed for South Africa from England on July 22.

During his stay in South Africa he will visit the High Commission Territories and Southern Rhodesia in addition to the Union.

Leaving Cape Town on Sept. 23, Mr. Amery will visit Australia, October 10 to November 17; New Zealand, November 22 to December 20; and Canada, where he will arrive about January 5 or 6. Mr. Amery is expected to spend a month in Canada before returning to England.

Mr. Amery's staff will consist of Mr. G. B. Whiskard, C.B., assistant secretary in the dominions office; Mr. G. Huxley, a member of the staff of the Empire Marketing Board, and Captain W. Bass, M.P. Mr. Amery is accompanied by Mrs. Amery, who is a Canadian—a sister of Sir Hamar Greenwood.

Teaching Empire History

Primary Schools Should Have Advantage As Well As Universities

Much has been done in recent years to make young Englishmen, at all events those whose opportunities lead them to the universities, reasonably acquainted with the growth of the Empire, its constitution and the methods of which it is governed or governs itself. But it is not sufficient that those, whether at home or overseas, who will be called upon to take a definite part in such government should be qualified to do so. Every voter should as far as possible, be so qualified, and, if this is admitted, it follows that the teaching of Empire history and affairs must be in the primary and secondary schools throughout the Empire as well as in the universities.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

Better Class Of Immigrant

"I believe it is quite likely that the volume of immigration of a very good class of will grow much larger in the immediate future," said Hon. Robert Forke, Minister of Immigration, who has returned from England. While abroad, Mr. Forke visited the agencies of his department maintained in Great Britain, Antwerp, and Paris. He visited Norway, Sweden, and Denmark in connection with immigration matters and conferred with cabinet ministers in those countries.

For corns and bunions use Minard's Liniment.

New High Speed Ships

Will Cross Atlantic From Germany In Four and a Half Days

Vincent Astor, recently returned from Europe, brings news of interesting, high-speed transatlantic travel developed in Germany.

Within a short time German ships will cross in four and a half days. The rest of such high speed will be great even with modern Diesel engines, fuel consumption going up many times faster than a ship's speed.

But two of the high-speed ships will make as many trips across the ocean as three of their fastest counterparts could make. That will make up for speed cost, saving 50 per cent. in ships and crews. And the short trip will draw the best paying customers, including the idle rich, in whom it does not make any difference how slowly they go. They think they are in a hurry and very busy, and willingly pay for speed.

Plan Scottish Dictionary

Ambitious Project To Be Carried Out In New York

Under direction of the Scottish Dialects Committee a new Scottish dictionary is to be issued. It will consist of from ten to fifteen parts, each part being issued as it is completed. While the project might be self-supporting should there be a sufficient number of subscribers, the committee is being aided financially by the Carnegie Trust, and is sending appeals to Scots at home and abroad, and also to Burns Clubs, St. Andrew Societies and Scottish County Associations. Representatives will be sent to Ireland, New Zealand and other countries to gather material, in seeking information a questionnaire brought 15,000 replies from the district of Edinburgh alone.—New York Morning Telegraph.

Alberta Cattle Breeder Sells Herd

Allen B. Willes, breeder of Ayrshires and Yorkshires, Clover Bar, Alberta, has sold his entire herd of 65 head of pure bred Ayrshires to parties in Seattle, Wash., U.S. It is unusual for whole herds to be sold at one stroke. The sale apparently indicates that the demand for Western Canada live stock is steadily increasing.

It Bids Pain Begone. — When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Indigo producing plants are grown throughout China to make dye for the blue clothing worn by Chinese lower classes.

Easily prepared

It is always of exactly the same quality and strength, so baby's bottles take no time to make with Eagle Brand—the safe food since 1857.

Leaves For Hudson's Bay

British Engineering Expert Is Accompanied By Official Party

Frederick Palmer, British engineering expert, who has been retained by the Dominion government to report upon the Hudson Bay harbor development at Port Nelson and Port Churchill, arrived in Ottawa, July 27 from England, accompanied by E. J. Burdick, prominent engineer of London, England, and left at once for Hudson Bay with the official party, which includes Hon. Charles A. Dunning, minister of the department of railways and canals, and Major Graham Bell, the deputy minister.

The Terror of Asthma comes like a thief in the night with its dreadful thrashing, rubbing its victim of breath. It seems beyond the power of human aid to relieve until one tries the remedy of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and if the remedy be used persistently, the disease is put permanently to rest. Take no substitute.

A long-legged sheep in the Himalayas is able to run 40 miles an hour. Even the modern Mats would have a hard time keeping up with a clip like that.

Coal Production Increasing. Latest official figures show that coal production in both Alberta and Saskatchewan is increasing.

Minard's Liniment for burns.

Perhaps a widow finds it easy to get married because she doesn't expect perfection in a man.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Western Canada To Be Important Section Of One Of World's Greatest Countries

Western Canada, "An Acre of Diamonds," is destined to be in the years to come one of the greatest parts of one of the greatest countries of the world, according to Roger W. Habsen, prominent statistician and authority on business affairs, who addressed the Board of Trade at Calgary recently.

Mr. Habsen dealt with the location, the climate and the resources of the country and to the characteristics of the people who comprise its population. He spoke of the emigration of the Canadian youth to the United States, and deprecated the fact that more about Canada is not taught in the universities in order that students might be shown that to go to the United States is but to live on milk and honey for a few years only to be thrown on the scrapheap later, when, had they stayed in Canada, they might start from the bottom of the ladder, but surely build business and financial independence for themselves.

Dealing in detail with this exodus, which has been taking place from Canada to the United States, the speaker declared that, during his travels in Canada he has made a point of acquiring from the young people whom he has met, to find out what their primary ambition is. He has found here many young people from the British Isles and Australia who are staying in Canada only until their quota in the United States may be thrown open.

"In your universities and colleges, you are teaching your young people about history and the sciences and law, but are you teaching them enough about Canada?" he asked. "Are you teaching them anything about Canada's abundance of resources? Are you telling them the truth about the economics of Canada?"

Much can be done to really assist these young people by educating them to the true economic condition of the United States. At present that country, he continued, is bearing forward in a great wave of prosperity, but the wave cannot always last; the stock markets cannot always continue to go up. There must be a time when the tide will swing the other way and when the depression comes, the Canadians, the English, the Scotch and the Australians will be the first to be cast out of employment. Much can be done to prevent this disaster for them by a proper method of education, he continued.

Canada, he declared, has the proper climate because a temperate climate is necessary for the building of sturdy, virile manhood. Such a climate has always been responsible for the rising of the races of men, who have contributed the most to the world's progress, and the speaker gave example in the development of the United States to show that the large majority of the men who really contributed most to the upbuilding of the nation's greatness came from the northern climates.

Shipping Horses To Russia

Western Horses Bound For Russia Leave Alberta

The first of the 4,000 Canadian horses ordered by the Russian Soviet government has left Alberta. It is announced by J. M. McCallum of the Canadian Department of Agriculture. Arrangements were made for a trainload of 26 cars, carrying 598 horses, to leave Calgary and Medicine Hat.

Although some difficulty has been caused in procuring the number of horses required because of the price offered, Mr. McCallum said the first boat load would leave Quebec only a few hours short of the 1,400 previously arranged for.

Advice Seemed Good

Certain actor, playing the part of a consumptive hero, practised a realistic cough. During the first performance he coughed continually. After one terrific explosion his old tutor, to the play, had to remark, "My dear friend, what can I do for you?" Whereupon a sympathetic friend from the gallery exclaimed, "If you are his friend, why don't you give him a blooming coughdrop?"

Good Prospects For Sheep

Prospects for the sheep industry are most hopeful this year with good prices in sight for both lambs and wool, according to W. H. J. Hildale, assistant manager of the Canada Co-operative Wool Growers' Association, who has just completed a tour of the wool growing districts of Western Canada.

W. N. U. 1693

Have Become a Menace

Rabbits Undermining Lighthouse At Entrance Of Juan De Fuca Strait. The rabbit, such a pretty and attractive pet when kept in a hutch, is undoubtedly one of the most destructive and dangerous pests among the mammals.

In Anstrutle, millions of dollars worth of damage is done by it every year, and hundreds of thousands of dollars have to be spent in erecting wire fences, laying traps, and so on, to keep down the pests.

A similar state of things exists in California, and now the rabbit is destroying Smith Island at the eastern entrance of the Strait of Juan de Fuca.

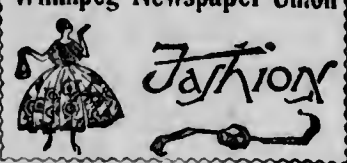

Here the animals are proving more destructive than the sea and they have so undermined the lighthouse standing there that it is in danger of falling.

Twenty-five years ago a former lighthouse keeper took a pair of rabbits to the island and began breeding them to supply the Seattle market, little realizing what the result of his experiment would be.

The rabbits multiplied at an alarming rate and overran the island, eating every green thing and tunnelling through the sandy soil. Not only the lighthouse and the wireless station are now in danger, but the very island itself is threatened, for, undermined as it is, in all directions, and covering only 56 acres, it will fall an easy prey to angry seas.

It is astonishing what a danger and a menace to a country a little animal, which, individually, is not only inoffensive but attractive.

Winnipeg Newspaper Union

A Modish Separate Blouse and Skirt

Exceedingly smart is the blouse shown here, of unusual design, having neck at the shoulders, and a square neck. Contrasting material is used for the bands under the scallops at the left side of the blouse and on the long tight-fitting sleeves, cuffs on the short sleeves, and patch-pocket. The blouse is No. 1589 and is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 2 1/2 yards 39-inch or 1 1/2 yards of 51-inch material; 1 1/2 yard less 39-inch for short sleeves; 3/4 yard 39-inch contrasting material. Price 20 cents the pattern.

The skirt, having an inverted plait at each side of the front, and slight gathers at the back, is joined to a dart-fitted, under-bodice having a shaped top, or shoulder straps. The skirt is No. 1590 and is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 1 1/2 yards 36 or 39 inch material for skirt; 1 1/2 yards 26-inch material for shaped top, or 1 yard for straight top with shoulder straps. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

England Enjoys Empire Fruits

Depends On Export From Dominions For Luxury In Winter

In our use of fruit today, as the Secretary of the Dominions has just put it, we are still far behind the United States, as the Continent is far behind us. The Americans had the start of us by the luck of their position. The United States, possessing not one climate, but many, produces within its own frontiers an abundance of all the fruits of the temperate and sub-tropical zones, and the Tropics are at its doors. Our small islands, though we may boast that the fruits which we do grow on one or another grows better, cannot provide for twelve months in the year. It is only since the Dominions began to develop their natural resources and send us the crops of the orchards under the Southern Cross that we have had peaches and plums in winter and apples all the year round.—London Daily Telegraph.

Injustice To Agriculture

Food Shortage Is Predicted In United States Within Next 40 Years

A revolt by the industrial population against high food costs was pictured before the Institute of Politics as a possibility in the United States within the next 40 years.

Henry A. Wallace, son of the former Secretary of the association, in an address on the agricultural situation, declared the grave injustice that has been done to agriculture during the past six years. He predicted a food shortage within 40 years with resultant disturbances that will cause industrial centres a thousand times as much worry as the present farm situation.

He also warned that the industrial population might precipitate trouble when an insufficiently inadequate food supply compels them to pay undue proportion of their wages for food.

Offer High Price For Poultry

University Of British Columbia Refuses \$1,000 For Hen

An offer of \$1,000 for the famous hen No. 6 or \$3,000 for a pair of ten birds of last year's Experimental Farm contest at Agassiz, of which Hen No. 6 was one, has been made to Professor Lloyd, of the University of British Columbia, who is in charge of the British Columbia exhibit at the World's Poultry Congress, where these birds are being exhibited.

Dean Clement, head of the College of Agriculture in the U.C. University, to whom the offer was referred, announced recently that it had been declined as the birds were of too great value to the University for breeding purposes to dispose of them. The offer is said to be the highest ever made for utility stock.

British Children Travelling

More applications are now being received at the British passport office for copies of children to be included to parents' passports than ever have been dealt with before. Travellers going abroad for brief periods are taking younger members of their families with them and the demand for children's accommodations has become so heavy that extra provision has had to be made on many ships for young passengers.

Found More Money In Hay

A ton of hay bought for \$23 on the track at Hudson, Ont., costs \$175 at Red Lake. A far-sighted prospector staked about ten acres of comparatively clear land at Suakoo Falls. The following summer he cut and stacked twelve tons of wild hay which he sold to a transportation company for \$125 per ton in the stack; he has since ditched his pick and shovel in favor of a scythe and rake.

Poultry Business Profitable

Canada Not Yet Aware Of Importance Of Industry

An honor was paid to Canada by selecting Ottawa as the scene of the World's Poultry Congress. This is only the third congress that has been held, so that the place of the Dominion in poultry matters has early received international recognition.

Canadians are so much accustomed to hear about the value of the wheat produced in the West, the value of our lumber and minerals, and the value of our manufactures, that the importance of the poultry industry is lost sight of.

There are few great poultry farms, but it is the few here and the few there that combine to make up a vast and, to those who know how to handle it right, a very profitable business.

Fifty million dollars is the value of the annual production of eggs alone in this country. Many millions more must be counted for poultry sold for the table.

Canadian eggs stand foremost in quality. They command the highest price for eggs imported by the British market.

That position is only achieved by sound breeding. The result carries its own message for the farmers of this country.

If quality of eggs commands the highest price in the export trade, the same principle applies to bacon, butter, cheese and every other product. In those lines Canada is either falling behind or almost standing still.

There are too many farmers who are content to jog along, doing a little better than just making ends meet. They need stirring up to a realization of their opportunities. They owe it to themselves and to Canada, so that every article that is sought by expert buyers will measure up to one standard—the best—and importers will have confidence that if it is Canadian it is good.

Use Tar Sands On The Road

Ninety Carloads Of Tar Sands From Fort McMurray To Be Used At Jasper

Ninety carloads of tar sands will be shipped from McMurray during the present summer, to be used in road-making at Jasper Park. The work of surfacing the roads is being supervised by Dr. S. C. Ellis, of Ottawa, who has spent several years investigating the tar sand deposits and experimenting with the material with a view of developing some practical means of utilizing the material. A piece of road paved with the tar sands in the City of Edmonton some years ago under the supervision of Dr. Ellis, is in almost as good condition today as it was when first laid down, in spite of heavy traffic.

Weight Of Rainfall

One Inch Of Rainfall Deposits 113 Tons Of Water On Each Acre

One does not usually associate rain with great weight. Even when the clouds let loose a torrential down-pour the mind reckons it in ounces rather than tons, yet one inch of rainfall deposits 113 tons of water on each acre of ground surface. To take an extreme case, so far as known rainfall goes, that of Cherrapunji, in India, on the watershed of the Ganges, nearly 30,000 tons have fallen in but one month, August. The average annual rainfall of 426 inches there comes to nearly 50,000 tons to the acre.

Car Salesman: "And what kind of a horn would you like, sir? Do you care for a good, loud blast?" Haughty Customer: "No; I want something that just soooooars."

Migratory Birds Treaty Between Canada and U. S. Has Been Very Beneficial

Horses Deserves Best Of Care

Is Still Indispensable and Renders Good Service

The horse is a faithful, patient friend of man. He deserves the utmost care and attention. He still plays an important part in the economic life of the nation, and is still indispensable. In short hauls he is cheaper power than the auto. Apart from treating the horse well for his faithfulness, it pays to use him well from the standpoint of service. A well-fed, well-cared-for horse will be in a position to render better service than the horse which is neglected and ill-fed.

Now that the hot weather is in evidence, those using and having the care of horses should give them extra attention. Of course they should be well supplied with food and water, and they need a large quantity in the course of a day.

There are two sources from which the working horse may suffer great annoyance and pain—one is the collar, the other the bit. Almost every working horse bears scars or a painful sore on the top of his neck, where the collar has galled him. Often he is compelled to wear a breast collar, and this places him at a disadvantage when hauling a heavy load. A properly fitted collar, well adjusted and padded, will cause no trouble.

Be good to your horse. He will be grateful to you and will render you increased service.

Retain Women Employees

No General Removal Of Policy On The Part Of The C.N.R.

"The Canadian National is not as a general principle, substituting men for women in the various clerical positions throughout its system," stated W. A. Klugland, general manager of western region, Canadian National Railways.

Press reports that women were to be let out of clerical positions all over the system and men substituted, caused consternation to the ranks of women workers for the railway, which situation is now clarified by Mr. Klugland's statement.

What is being done, Mr. Klugland stated, was that in certain clerical positions where, due to conditions, it was considered that men were better fitted for the work than women, men were being substituted, but there is no general reversal to the policy which existed before the war, when men were employed throughout the service, and few, if any, women.

Trying Color Cures

By replacing white walls and red coverlets in hospitals with delicate green, yellow, and mauve ones. It is claimed that patients are kept in a better temper, sleep well, and leave hospital three days sooner than under the old conditions. One individual, afflicted with chronic insomnia, went to sleep within an hour in the restful atmosphere of a room decorated in mauve.

Seek Cooler Motor Car

Experiments at the air research laboratory of the American Society of Heating and Ventilating Engineers in the Pittsburgh bureau of mines may lead to many developments in automobile design, according to F. C. Houghton, director. Among the possibilities are mentioned white roofs and strips of damp burlap or some other device to lower temperature in hot weather.

"If spring shooting of migratory game birds had not been abolished throughout North America in 1916 there would not now be left a sufficient number of birds of certain important species to provide shooting for anybody, either in spring or fall."

This considered opinion of a Canadian game conservationist brings in to high relief the benefits of the Migratory Birds Treaty between Canada and the United States and the Acts which implement it. The complete extinction of the passenger pigeon shows that this is not an overstatement, for while the case of the passenger pigeon presents peculiar features, nevertheless the fact remains that this beautiful and useful bird was exterminated because of lack of protection at the spring nesting time. The passenger pigeon in the 50's of the last century flocked in Canada and the northern United States by millions, yet so rapid was the process of extermination that this bird had completely disappeared nearly thirty years ago.

This and other facts concerning the possible practical extermination of some of our remaining species of migratory game birds—geese, ducks, etc.—have led to the general acceptance by sportsmen of the prohibition of spring shooting as a necessary provision. Under the old piecemeal methods of local regulation on the one hand, and the decreased area of breeding grounds and increased efficiency of hunting arms on the other, many species of migratory game birds were, before 1916, dwindling in numbers in a most rapid and alarming manner. Crossing as they did provincial, state, and national boundaries in their seasonal flights, the birds could not be protected unless the regulations were continent-wide. That was secured by the Treaty and like good sportsmen the different provinces and states are playing the game. In the United States the shooting of ducks and geese stops on January 31, so that these birds are protected on their northward flight to Canada.

Everyone knows that there is no surer way to exterminate any animal or bird than to pursue and harry it immediately before and during the breeding season. Taking into consideration that every bird arriving in Canada has survived a winter and two migrations, it is probably not over the mark to say, from the standpoint of bird conservation, that each bird killed in spring is the equivalent of four or five killed in the autumn. The abolition of spring shooting, according to reports from all parts of the country, has increased the fall flights, and birds are now nesting in localities where they had not been seen for so long that people had come to believe they had never nested there. The object, of course, in these measures is not to reduce human profit and pleasure but to increase it by perpetuating and increasing the numbers of the animals or birds concerned. Speaking of the country as a whole, Canada has held a good stock of moose and deer, and is rapidly bringing back the buffalo and the elk, and there is every reason to believe that the same happy result will follow the efficient management of North America's wild ducks and geese.

Another Royal Ranch

Land On Vancouver Island May Be Presented To Prince George

Prince George may be the recipient of a ranch at Cobble Hill, Vancouver Island, B.C., when he and the Prince of Wales visit here this summer. The proposed presentation has been sponsored by the Associated Boards of Trade of Vancouver Island, and the Government will be asked to vote \$25,000 for the purpose, the City of Victoria \$10,000 and other municipalities on the island \$10,000. The remaining \$40,000 of the \$85,000 would be raised by public subscription.

Although the ranch, including machinery and equipment, may be purchased for \$85,000, it is stated that \$265,000 has been expended on it. The project will go before the Government almost immediately.

Hunting For New Double Stars

Through a huge telescope that has been completed after many months of work, astronomers propose a ten-year search about the skies from an observatory in South Africa for the purpose of measuring the known double stars and to hunt for new ones. The lens for the instrument was made in Pittsburgh and cost \$25,000. It will be mounted under an electrically operated fifty-foot dome, costing approximately \$30,000.

RUNNING AHEAD OF THE TIMES

To keep abreast of the times is good, but to run ahead of them is better, and that is what the Canadian National Railway are doing in putting on the rails this powerful oil electric car, the latest invention in railroad transportation equipment. Two of these cars has just come west from Montreal for service on the line between Saskatoon and Edmonton.

They are fashioned after the oil electric car which made the famous run from Montreal to Vancouver in seventy-six hours in the fall of 1925, but they contain many improvements and additions and are equipped with six-cylinder engines. Although many railways in the United States have endeavored to evolve a car which would be economical to operate as

well as able to satisfy the demands of traffic, the Canadian National Railway have been the only system, up to the present, successful in producing a self-propelled unit capable of fulfilling all the requirements. The new cars are 73 feet 9 inches in length and ten feet wide and have commodious baggage, passenger and smoking compartments. They can carry 200 gallons of fuel.

WORLD HAPPENINGS
BRIEFLY TOLD

Automobile accidents claimed 573 lives in 77 large cities of the United States during the four weeks ending July 16.

Kinjiro Matsudaira, a Japanese born in the United States, has been elected mayor of Edmonton, Mo. He was unopposed in the balloting.

Rev. W. B. Tighe, president of the Ottawa district Baptist Association, is dead. He was 57 years old and was formerly stationed at Winnipeg and Yorkton, Sask.

A consignment of half a million King salmon eggs from British Columbia for a private firm in Argentina, has been shipped from Puget Sound. The eggs are to be placed in a tributary of the Rio de la Plata.

Captain N. A. Sullivan, captain of the Renown, which took the Duke and Duchess of York to Australia, was invested by the King at Buckingham Palace with the insignia of a Commander of the Royal Victorian Order.

The annual crime loss in the United States is about \$2,000,000. It was stated at Atlantic City by delegates meeting for the thirtieth annual convention of the National Surety Company, of New York, which opened there.

The first system of aerial transportation for passengers, mail and express matter in the West Indies will begin operation about October 1. It will connect points in Cuba, Santa Domingo, Haiti and Porto Rico, and flights will be made twice each week.

Miss Sarah Fuller, pioneer in teaching the deaf to talk, died at her home, Newton, Mass., in her 92nd year. She was associated with Alexander Graham Bell, whose teaching of the deaf and the study of acoustics led him to the invention of the telephone.

The Dal Eireann has voted £20,000 (about \$100,000) in a lump sum as a provision for the widow and children of the late Kevin O'Higgins, vice president of the Free State Council, who was assassinated recently. The money is vested in trustees.

Carrying with them marks of merit in the shape of some of the most coveted trophies in the Empire, part of the Canadian Hsley team arrived home. They brought the Kolapore Cup and the McKinnon Cup, both in which they won at the Hsley meeting.

Curb British Money Lenders

New Bill Contains Restrictions Which Will Benefit the Public

The Moneylenders Bill which has passed the British House of Commons and is now before the House of Lords, is practically certain of a safe passage to the Statute Book. The Bill is expected to come into force next New Year's day. Its provisions are:—

(1) Every moneylender must take out an annual license costing £15, in respect of each of his offices; (2) Moneylender's circulars are declared illegal, unless asked for; (3) Moneylenders may advertise only in a specified form; (4) Moneylenders may not employ canvassers (touts) or agents.

(5) Memoranda of contracts must be signed by borrowers and copies supplied to borrowers within seven days; (6) Contracts must show the date of the loan and the interest per cent. per annum; (7) Compound interest, and increase in the rate of interest for default, are prohibited; (8) Moneylenders must supply on the borrower's demand at any time a record of the state of any loan.

(9) Interest is limited to 45 per cent. per annum, unless proof can be produced that higher interest is not "harsh and unconscionable." (10) Preliminary charges are forbidden, and there is a general limit of twelve months from the date of default to actions by moneylenders; (11) The measure applies (with certain modifications) to Scotland, but not to Northern Ireland.

Value Of Character

Any man who knows enough to appreciate the value of money, or possessions of any kind, knows enough to appreciate the value of character, temperance, industry and politeness. Character is not an ornament to teach children, or write or lecture about, but the first help in getting along in life as easily and comfortably as is possible.

The United States manufactured a hundred billion cigarettes last year, most of which were smoked by young men who say they never had a chance to save any money.

A man may be able to argue with a woman, but it never does any good.

W. N. U. 1693

Home Of the Cave Men

Evidence That Scotland Was Inhabited in Prehistoric Times

Evidence that Scotland was inhabited by cave men in the chilly days of the old stone age has been obtained as a result of excavation in caves of northern Scotland.

James E. Cree, who directed researches in four caves, under a grant from the Royal Society of London, has reported the discovery of two human skeletons in connection with bones of bears and other animals of frigid climates.

Further evidence of man's occupation of the caves in ancient times was found in a lower level of gravel containing antlers and bones of reindeer together with tools of reindeer horn, antlers cut and scratched by human beings, and bits of charcoal which showed that fires had been burning.

These finds are the first indication that there were any human beings in Scotland as far back as the Paleolithic era, which ended some 10,000 years ago. Mr. Cree's researches have disclosed the first bones of cave-bears and Arctic foxes to be found in Scotland.

Further search for traces of stone age culture will be made during the summer, it is planned.

Air Mail Conference

Canada To Be Represented At Meeting To Be Held At The Hague

L. J. Cahoury, Deputy Postmaster-General, will represent Canada at the Conference on International Air Mail, which has been called by the International Postal Union to be held at The Hague on September 1. Twenty-five countries will send delegates and representatives of the leading aircraft companies of the world will be present. Temporary agreements will remain in force until 1929, when they will be submitted to the Universal Postal Union, which meets in London in that year.

It is still hoped by officials here to have some experimental flights made during the coming fall, probably in the Gulf of St. Lawrence, in order to have definite information upon which to call for tenders next spring. The experimental work is a matter of arrangement between the Postoffice Department and the Department of National Defense.

Shirring Is Shown On a Dainty Frock For the Junior Miss

Charmingly simple is the demure frock shown here and is a style the home modiste will find quite easy to fashion. The opening is at the back and shirring forms an attractive self-tightening around the neck, at the waist and lower edge of the long raglan sleeves. No. 1548 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards 39-inch, or 1 1/2 yards 54-inch material, and 1/2 yard 36-inch lining for stays under the shirring. Price 20 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done as easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Artist Goes To Arctic

Takes Long Trip To Paint and Sketch Scenery in Northern Canada

A. V. Jackson, Toronto artist, has left Toronto on his trip to Craig Harbor, Ellesmere Island, 750 miles south of the pole, where he intends to paint and make sketches.

"The reason why I am going to paint in the far north," Mr. Jackson says, "is because I think the ordinary pastoral painting, as practiced now, is a dead letter. New art forms are necessary if the artist would develop. I think I will find new art values in the far north."

"Fresh inspiration and freedom from convention are necessary to develop individually in Canadian art," he explained. "The work of those who follow in the old pastoral tradition must of necessity relate itself to that of the European schools, and be imitative, because it lacks spontaneity."

"The Canadian artist is beginning to realize that there is interesting material for his work in this country and has little desire to go to Europe any more. Let the artist get a grounding in his work here; then if he wants to let him go abroad for the museums."

"I believe that the development of Canadian consciousness is going to come through painting. Many people believe that it is coming now."

"There is a country to the north of us which is unique and distinctly Canadian. Let our artists turn explorers, let them go up into this territory and interpret it for Canadians. Much has already been done. We have heroic landscapes of Hudson Bay and the Labrador Coast. Thompson's 'West Wind' will serve to explain what I mean by 'heroic landscapes.' Canada's great background for heroes has been treated too often as a stage for a mere Punch and Judy show."

Historical Data

Exhibit Relics Of Old H.B. Days In North Canada

Relics of the history of the Hudson Bay Company were exhibited in Winnipeg recently for the first time. Many old documents, books from old libraries used in the long night of the Arctic, swords, guns, marriage licenses, signed before the company officers, and examples of life from every part of the country touched by the company were on view.

A model of the Nonsuch Ketch, the little ship that started the ice floes of Hudson Bay in 1668, a facsimile of the charter granted by King Charles II. in 1670, along with the deed of surrender of the land by the Hudson's Bay Company to the Dominion of Canada, portrayed the historical events linked up with the opening of the north country. Andrew McBurnett's peppercorn lease of land for 1,000 years on payment of one peppercorn a year is among the collection.

Russian Phone Girls Protected
Russian telephone operators are protected by law against being scolded. If a telephone user abuses his temper and says what he feels into the transmitter, the offended operator merely reports the number and his telephone is promptly disconnected for a time. The Soviet "Hello Girls" give few wrong numbers, however.

Clay Products In The West

Clay products made in Manitoba, Saskatchewan, Alberta and British Columbia last year were valued at \$1,829,915, compared with \$1,412,537 for the previous year. Alberta led with a production valued at \$501,922.

British Bowlers Tour Canada

Members of the British Lawn Bowling Association who arrived in Canada recently on the Canadian Pacific steamship Mellie to engage in a series of test matches across the Continent as far as Victoria. The British players came to Canada at the invitation of the Dominion Lawn Bowling Association and represent the leading clubs of Great Britain.

The first test match was played in Montreal and from here the party

CHARLES L. WELDON

whose appointment as acting manager of The Macdonald Hotel, Edmonton, was announced by Walter Pratt, general manager of the hotel system of the Canadian National Railways, July 1st. Mr. Weldon, who is the son of the former managing director of the Windsor Hotel, Montreal, commenced his career with that hotel in 1909 and left to serve five years overseas with the Canadian forces in the Great War. On his return he joined the United Hotel string and successively was assistant manager at the King Edward, Toronto; The Book Cadillac, Detroit; Benjamin Franklin, Philadelphia, and the Mount Royal, Montreal. In May of 1926 he joined the Canadian National Railway Hotel System as assistant manager at Jasper Park Lodge, Jasper, Alberta, and after the summer season he was assistant manager of the Fort Garry Hotel, Winnipeg. This season he was again assistant manager at Jasper Park Lodge until his new appointment.

Will Compete For Imperial Trophy

B.C. Growers Going After Cup At Imperial Fruit Show

British Columbia intends to make a strong effort to capture the Agri-General Cup, which is offered for the first time at the Imperial Fruit Show at Manchester this year. For the last few years this province has won most of the chief awards, but these have been taken by exhibits prepared by the Associated Growers. To win this challenge cup the highest honor of the show—a goodly number of entries are required, according to the conditions, and in previous years individual growers have abstained from entering on account of the expense and trouble involved. To overcome these difficulties the British Columbia Fruit Growers' Association is arranging to collect individual entries and forward same in one provincial lot.

How It Happened

A negro taxi driver was charged with having run down a pedestrian. "When you are driving," said the magistrate, "and you see you are about to hit some person, you should zigzag your car." "I did zigzag, your worship," said the negro. "but that man was zigzagging, too, and he zigged so much faster than I could zig that I just natcherly give me de swimmin' in de head, and dat's how I come to hit 'im."

Felspar Found At Lake Of the Woods

A Winnipeg firm which manufactures building materials is making test with felspar from the lake of the Woods, where deposits are being opened up. Felspar is used in the manufacture of glazed tile, porcelain, insulators, etc.

SUNDAY SCHOOL LESSON

AUGUST 14

DAVID BRINGS THE ARK TO JERUSALEM

Golden Text: "We shall be satisfied with the goodness of Thy house, Thy holy temple." Psalm 65:4.
Lesson: 2 Samuel 2:1-4; 5:15; 6:1-15; Psalm 24.
Devotional Hending: Psalm 51:1-4, 10.

Explanations and Comments

1. David Made Klag Over Judah, 2:1, 4.—David went northward with all his household and his men, some six hundred of them (1 Sam. 27:2; 1 Chron. 12) from Ziklag, where he had been living with the Philistines as their vassal, and there settled in Hebron and in the cities round about Hebron. Thither came the men of Judah and anointed David king over the house of Judah. "How much choice they had in the matter is difficult to say. The muster of a devoted band of seasoned soldiers was a very dangerous man to elect. On the other hand, the public defense was likely to be well attended to by such a man, and then David had always been well-disposed toward his own people." —Smith.

11. The Dual Kingdom, 2:5 to 4:12.—A period of seven and a half years is covered by the text omitted from our lesson, during which David was king of Judah, and Ishbosheth, the son of Saul, was king of the Northern Tribes. During this time there were continual feuds between the rival generals, Abner on the north and Joab on the south, though we have the record of only one battle, David seems to have kept out of the contests. His power constantly increased, while that of Ishbosheth, who seems to have been only a tool in the hands of Abner, decreased. Then Abner made overtures to David to make the latter king of Israel. Perhaps Abner was moved by selfish motives, because he saw that Ishbosheth's star was waning, or perhaps he resented the suspicion of Ishbosheth that he was seeking the throne himself in taking to himself one of Saul's secondary wives. David demanded as proof of Abner's loyalty the return of Michal, Saul's daughter, for as the son-in-law of Saul David would be heir to Saul's throne. Abner seems to have compelled Ishbosheth to bring this about. Abner visited Hebron, was hospitably entertained, and departed, and then he was treacherously slain by Joab. Ishbosheth could not long maintain his kingdom with out Abner. The disaffection grew, and finally Ishbosheth was stabbed to death in his chamber by two of his captains. In great haste they carried his head to David as a welcome present, but they had mistaken their man. They met the same fate that David had meted out to the Amalekites who claimed to have slain Saul.

Favorite Author Of Prince Of Wales

Kipling Is Only One He Quotes From Memory

The Prince of Wales probably read more as a boy than he has done since. He was given a simplified edition of Captain Cook's "Voyages of Discovery" by King Edward when he was seven years old, and this book absorbed him at once. His then tutor, in a monthly report, remarks: "The prince is to be congratulated with Cook," which led to him being deprived of "Voyages of Discovery" for a month. Macaulay's "Lays of Ancient Rome" made a strong appeal to him, especially the lay that tells the story of the Battle of Lake Regillus. The lay entitled "The Spaniard" finished by another writer also strongly attracted him. But a selection of Longfellow's poems given him by the Duchess of Connaught decidedly did not. "How do you like the book of poems I gave you?" the prince's grand aunt asked him a little later. "I don't like it at all," was the frank reply. "I think they are dreadfully dull."

The prince began to read Kipling when he was twelve, and from that time Kipling has been his favorite author. Kipling is perhaps the only author whom he has ever quoted from memory.

Put On With Brush

"Gilding the lily" has been applied to peaches as a commercial proposition. It took the public some time to discover that the beautiful bloom on a great deal of fine looking fruit was put on with a brush. Complaints were made to the police but the police unhesitatingly replied that their eyes weren't any better than those of customers who buy the fruit. The fraud squad has been instructed to stop the practice.

Prospecting At Smithers

A report received from Smithers, Central British Columbia, states that more actual new prospecting has taken place in that area during the past twelve months than in the preceding twelve years.

Father: "I am not at all pleased with this report from your teacher."
Youth: "I told her you wouldn't be, and, but she would send it. Just like a woman, isn't it?"

Advertising experts predict that the volume of newspaper advertising will increase 100 per cent. during the next ten years.

Mountaineers Fail Again

Towering Ice Wall Prevents Scaling Of Mount Robson

The great ice wall that guards the approach to the summit of Mount Robson turned back the two parties from the mountaineers of Seattle who sought to reach the peak, and another gallant failure must be added to the many that have been the lot of most Alpinists who have pitted the strength and skill of man against the might of this giant peak of the Canadian Rockies.

The mountaineers admit their defeat, but in their losing fight against insuperable odds, they added another brilliant chapter in a history which is bright among the Alpinists of the world.

On their ascent from the floor of the valley to the high camp, they fought a driving rain and low lying clouds which made progress difficult and dangerous. Higher than that they had to contend with sleet and later again, when the weather cleared, with snow that was often waist deep.

Over and through all these obstacles they struggled only to find their way finally and completely barred by the great ice cliff that threw a harriade across the only approach to the summit. More than eighty feet high, in some places a full hundred, this terrific wall of ice rose almost perpendicularly from the lower glacier.

There was no way up it, no way around. To make either attempt was to court instant death. There was nothing to do but retreat and leave the honors with the monarch of the Rockies.

For this year at least the battle of the mountaineers with Robson is over. It is a truce only. Some other day they will come back until their colors of white on a background of green float from the silver turban of this giant of the north. Meanwhile they will content themselves with ascents of lesser peaks, the sentinels the colossal Resplendent, Nunn, Whiteman and the other mountains that rise from this beautiful valley where millions of flowers of a million hues bloom even to the edge of the glaciers, and snow-capped peaks that girdle it meet with the skies in an eternal tryst.

Establishing Airplane Bases

Three Bases Will Be Completed At Early Date In Hudson Bay Strait Area

The Bay Rupert, the Hudson's Bay Company's ship which was on the rocks off the Labrador coast, has been hauled off without serious damage and has continued her voyage. Radio messages in this effect were received recently by the marine department from the government steamer Beothic, which is carrying the airplane expedition north to the Straits. The Beothic reported that the site of the first airplane had been selected at a point near the northeast tip at Labrador at the eastern outlet of the Straits. Two of the six Fokker seaplanes will be left there with aviators and mechanics, a doctor and assistants.

The second base will be established midway up the Straits, and the third at the western end where the Straits join Hudson Bay. It is expected by the commander of the expedition, according to the radio messages, that the three bases will be completed within three weeks and flying operations will begin at once.

Queen's Jewels Priceless

Wonderful Gems Found On Mummy In Egyptian Tomb

Among recent important discoveries in Egypt, according to an Egyptian correspondent, is the finding in Egypt's western desert of a tomb containing the mummy of a woman, presumably a queen, covered with jewels of priceless description. Among these are eighteen bracelets of gold and silver, five necklaces in brilliants on her neck and a superhead crown studded with brilliants. Near the body were found other necklaces in sapphires and brilliants, also a statuette beautifully carved from porphyry. Hieroglyphs on the tomb indicated that the body is that of a princess who lived three thousand years ago, but it has not been possible yet to establish to what dynasty she belonged.

Boat Service Superior To Train

Crack de luxe trains in America are far superior to those in Europe, and yet train service has not kept pace with steamship service in the past 25 years. We had crack cannon-ball express 25 years ago when the transatlantic liners were rolling tubs. Today they are floating palaces. One never encounters impudent servants on first class liners, and that can not be said of first class trains.

You can save yourself lots of trouble by not borrowing it.

H. R. H. Prince of Wales Dedicates Peace Bridge Between Erie and Buffalo

Fort Erie, Ont., Peace was the word which kept recurring in the ceremonies of the day and peace between the English-speaking peoples was the very spirit of the occasion at the dedication by His Royal Highness the Prince of Wales of the new international bridge between Fort Erie, Ont., and Buffalo, N.Y.

It was a rare meeting of public men.

Two princes of the House of Windsor, the Prime Ministers of Great Britain and Canada, the Vice-President and Secretary of State of the United States, the Premier of Ontario and the Governor of New York State and cabinet ministers and the Canadian minister in the United States stood bareheaded on the bridge frontier.

The Prince, with an entourage of 30 cars, motored from Toronto in the morning after attending a veteran's open air divine service at Exhibition park. All along the highway the crowds greeted the Royal party and the Ontario countryside was at its midsummer best. In Hamilton and in St. Catharines, memorials to the war dead were decorated with wreaths by the Prince of Wales. Premier Baldwin and his party crossed Lake Ontario by boat and met the Prince at Humberston at Niagara Falls.

The bridge dedication was a ceremony of deep solemnity. Premier Baldwin made a reference of immediate significance. Speaking of differences between nations he said:

"Problems have arisen and will arise and will vary as to how they should be solved. Only recently we have had an instance of this. We have had to differ for the moment, but we know in our hearts that this does not affect our friendship."

The Prince of Wales said: "It gives me great pleasure to be present on the occasion of the formal dedication of this bridge which happily endures between the British Empire and the United States for more than a century.

"May this bridge be not only a physical and material link between Canada and the United States but may it also be a symbol of the maintenance of their friendly contacts by those who live on both sides of this frontier. May it serve also as a continual reminder to those who will use it, and to all of us, that to seek peace and ensure it is the first and highest duty, both of this generation and of those which are yet to come."

Sets Radiophoning Record
Berlin. The longest distance ever attained in commercial radiophoning a stretch of 7,500 miles—was achieved when wireless telephony was successfully inaugurated between Berlin and Buenos Aires, Argentina, via the Nauen radio station. Greetings were exchanged between German and Argentine government officials.

Attempt Novel Trip
Edmundston, N.B.—Two boys who left Halifax a fortnight ago in a small engineless car in an attempt to get themselves towed to the Pacific Coast, have reached here and have arranged a tow as far as St. Rose, Que., 40 miles away.

Railways Arranging For Harvest Help For Western Canada

Montreal. Arrangements for the handling of the 25,000 harvest laborers required by western Canada this year were completed at a conference of passenger department officials, representing both railways, held here, when dates and fares for harvest excursion trains to Western Canada were announced.

The two railways will operate harvest excursions on simultaneous dates from each area.

The first of the series will leave points in the maritime provinces on Saturday, August 29. Montreal and points in Quebec province will be served by excursions leaving on Tuesday, August 23. From Ontario, Toronto and points east, harvesters will be taken west in special trains over both railways on Tuesday, August 30. Southwestern Ontario points will be served by excursions leaving on Wednesday, September 7.

Subway Bomb Outrage

One Killed and Many Injured In Explosion In New York

New York.—At least one person injured in a series of explosions in New York, and more than a dozen two of New York's main subway arteries.

At the Fourth Avenue and 28th Street station of the Interborough Rapid Transit Company one person was killed and at least ten injured.

An unidentified man standing on the platform of the Brooklyn-Manhattan Transit subway at 28th Street was blown to the tracks by the force of the blast. Badly injured, he was picked up and taken to a New York hospital.

At least seven persons were injured at the Broadway and 28th Street station, according to firemen who arrived on the scene soon after the blast. The explosion was said by police to have been caused by a bomb planted in the lavatory on the south side of the station.

An unidentified man was taken from the wreckage unconscious and was moved to a New York hospital in a serious condition.

The ticket agent's booth was ripped to pieces, the walls of the station were raked down and pillars and sections of the ceilings were twisted and wrecked.

Subway service was paralyzed and Broadway surface cars were halted while police reserves were called to assist in the rescue work and handle the thousands of persons who gathered at the scene.

Baldwin Celebrates Sixtieth Birthday

King and Queen Send Greetings To British Premier

Ottawa. August 3 was the right Hon. Stanley Baldwin's 60th birthday and hundreds of congratulatory messages poured into Rideau Hall all day. Among them were messages from the King and Queen, expressing to the premier of Great Britain their congratulations on his 60th birthday.

He was presented with a silver salver by members of his staff, tokens of esteem from their Royal Highnesses, the Prince of Wales and Prince George and their Excellencies, Lord and Lady Willington, and a beautifully gold-mounted cherrywood pipe from Rt. Hon. Mackenzie King.

Non-Stop Flight Fails

British Aviator On Secret Trip To India Crashes

London.—The British air ministry announced that an attempt of a Royal Air Force machine to make a non-stop flight to India ended when the plane fell into the Danube River, in Austria.

Despatches from Vienna reported that the plane fell at Somewhere near Linz, the crash being believed to be caused by the over heating of the motors.

Flight Lieutenant C. R. Carr and Flying Officer E. G. Dearth, neither of whom, it was stated, was badly hurt, were taken to Aschach, near Linz.

Scandinavian States Have Outlawed War

Series Of Treaties Ensure Peace For All Time

Stockholm. By a series of unrestricted treaties of conciliation and arbitration, war has already been "outlawed" between Sweden and her Scandinavian neighbors, as well as with a number of other European countries. Prime Minister Carl G. Ekman declared in an interview.

"Of course," said the Premier, "if one of the parties breaks the contract, war may break out just the same, but it will not be 'legal'."

"We have agreed with these countries that all disputes, no matter how serious, are to be arranged peacefully. The methods of procedure differ slightly in each case, but the effect is the same. What we can not settle by direct negotiations or by arbitration will be decided by the International Court of Justice at The Hague."

The States with which Sweden has solemnly pledged itself to rule out war as a means of settling disputes are Denmark, Finland, Norway, Belgium, Poland, Austria and Czechoslovakia. The other Scandinavian states have also made similar terms with each other.

At present, negotiations are pending between Sweden and France for a similar agreement. The actual conference was to have started in June, but, owing to the parliamentary situation in France, it was postponed till next January.

Rockefeller Asked To Cancel Soviet Deals

British Group Want Oil Investment Withdrawn Is Report

New York.—The New York Herald Tribune says that an appeal to John D. Rockefeller, Jr., native head of the far flung Standard Oil empire, to withdraw from any financial deals with the Soviet Government has been made by Sir Henry Detering, managing director of the Royal Dutch Shell Oil group, of Great Britain. The appeal was made after the Royal Dutch group had been unable to block two large United States oil companies, members of the Standard Oil group, from entering into oil contracts with the Soviet.

In his letter Sir Henry is understood to have appealed to Mr. Rockefeller's interest in churches and philanthropic work, pointing out that the Soviet had destroyed churches and similar institutions as well as having confiscated property and nationalized all industry.

A Distinguished Visitor

London. Canada is to have yet another distinguished English visitor in a short time. Lord Hewart of Turry, lord chief justice of England. He will attend the annual meeting of the Canadian Bar Association in Toronto, which will open on August 21. Lord Hewart has held his present high office since 1922, when he stepped up from the attorney-generalship after having been attorney general from 1919.

May Return Via Canada

Edmonton. Requests that British regiments from China be routed homeward by way of Canada are now being considered by the British war office. This information was given in a cablegram that Mayor Hury received from ex-Premier H. Greenwood, commissioner of immigration for Alberta at London.

Poultry Congress Closes

Retiring President Receives Honorary Degree From McGill University

Ottawa.—With speeches expressing international goodwill and with a touching tribute to the retiring president, Edward Brown, of England, the third World's Poultry Congress concluded its business sessions.

Interesting announcements which featured the closing were:

Edward Brown, F.R.S., of London, England, president and founder of the World Poultry Congress, will have an honorary degree conferred on him by McGill University, Montreal, at a special convocation.

Their Excellencies Viscount and Lady Willington will shortly build up a flock of poultry of a breed which their Excellency particularly favors, as an outcome of the congress.

Ottawa Centenary choir may be taken to England in 1930, en bloc, to take part in the fourth world's poultry congress to be held in London.

United States poultry men are discussing chartering four ocean liners to carry them and their exhibits to the next world's poultry congress in London.

President Ernest Brown read messages from crowned heads of Europe and other distinguished personages, congratulating the congress upon its outstanding success at Ottawa.

Irish Leader Dead

John Dillon Was Outstanding Figure In Fight For Home Rule

London.—John Dillon, 76 years of age, famous Irish leader, died at a London nursing home following a severe abdominal operation.

John Dillon, who succeeded John Redmond as chairman of the Irish Nationalist party in 1915, was for more than 39 years one of the outstanding figures in the fight for Irish Home Rule. Almost from the day he entered Parliament from Tipperary in 1880, at the age of 29 years, he was conspicuous in Irish politics, beginning his career as a supporter of Charles Stewart Parnell, conductor with Gladstone in starting the fight for Home Rule.

Royal Birds Purchased

Prince Of Wales' Exhibit At Congress Sold For \$250

Ottawa. The most interesting event of a forenoon crowded with poultry auction sales upon the occasion of the closing of the world's poultry congress exhibition was the sale of the Prince of Wales' birds. They went under the hammer and were bought by Frank Johnston for the Canadian National Exhibition. The price for the trio of bird aristocracy was \$250.

About 200 buyers were on hand when the auction sale opened.

The King's pigeons were sold, the four of them brought \$75, and were purchased on behalf of the Canadian National Exhibition.

Held Justified In Killing

Beeton, Ont. Alex. Hodge was justified in killing Dan Forsythe when the latter invaded his home near here July 22, the coroner's jury inquiring into the case decided. The verdict read: "The jury sworn to inquire into the death of an unknown man have arrived at the conclusion that the said man was none other than Dan Forsythe and that he came to his death at the hands of Alex. Hodge, who acted in defence of his own life, and we deem him justified."

University Students Turn Harvesters

These alert and lucky lads are British University students here for the harvest. They came to Canada aboard the Canadian Pacific steamer Montrose, arriving in Quebec and Montreal recently. While awaiting their jobs in the harvest fields of Saskatchewan, they are being placed on Ontario farms during the harvest season, by Ontario Government agents. They will return to their respective colleges in England and Wales towards the end of October. The universities represented in this first "University Harvesters' Tour" of the present season—for others are following—are: Cambridge University, King's College, London, the London School of Economics, University College, London, Manchester School of Technology, Oxford, Reading, Southampton, and Swansea. Half of the students are from Agricultural Colleges or Faculties, most of them are from the classical side.

Canada's Net Debt Is Decreased By Over Fifty-Two Millions

Patient Carried By Plane

Woman's Life Is Saved By Patrol Aeroplane In Northern Manitoba

Winnipeg.—A flight of 150 miles by a fire patrol plane was made to save the life of Mrs. Loughton of Norway House, Man. The woman was taken seriously ill and an operation was necessary. Medical aid was to be had no nearer than The Pas as the doctor of Norway House had gone north to make a payment of Indian treaty money.

Flight-Lieut. Mawhew, after obtaining authority by radio from his commanding officer in Winnipeg, took off with his patient on his life and death mission. The plane carried the pilot, a mechanic, and Nurse Oliver of Norway House, besides the patient. The machine landed safely at The Pas and Mrs. Loughton was rushed to the hospital, where Dr. Drak performed the operation. According to the doctor the woman would have died if an operation had not been performed within 12 hours. Mrs. Loughton is recovering.

War Veterans Secure Land

Returned Men File On Homesteads In Saskatchewan

Mouse Jaw. All that remains of the once famous War Ranch, south-west of Colborne, consists of an eighty-acre park, the property of the Shamrock Rural Municipality. The remainder of the ranch pasture was filed on by homesteaders, and only one quarter section of very poor land was secured by the homesteaders, who filed on some 80 quarters. About one-half of the acreage was obtained by war veterans, and every parcel was secured by men of British birth who are actively engaged in farming operations within plus miles of the land they desired.

Vast Wealth In Peace River

Vancouver. "In the Peace River section is unmined wealth," Hon. Dr. J. H. King, Minister of Health and Soldiers' Civil Re-establishment, said here. "Just as soon as ways and means can be found the problem must be dealt with. I intend visiting Edmonton before returning to Ottawa and am seriously thinking of making a trip into the Peace River area."

Will Not Attend

It is stated on good authority that Rudyard Kipling, famous English poet, will not attend the semi-centennial celebration of the faculty of applied science and engineering to be held in Toronto on October 6, 7 and 8.

Promoted To Admiral

London.—Vice Admiral Sir Walter Henry Cowan has been promoted admiral. He is 56 years old and has been commander-in-chief of the North American and West India station since 1926.

Best Of Feeling Exists At Close Of Naval Conference

Geneva.—War between Great Britain, the United States and Japan is unthinkable, declared Hugh Gibson, chief representative of the United States, at the closing session of the tripartite naval conference. Hence there is no reason, he added, why an agreement, which has not been obtained at Geneva, should not be reached shortly as the result of direct negotiations between the Governments for a reconciliation of the divergent views.

The burial ceremony of the conference, held in the presence of a large assembly, was carried out without the employment of words of recrimination and as Right Hon. W. C. Bridgeman, head of the British delegation, said:

"We are not dispersing in a spirit of bitterness or despair."

When the conference adjourned since the after the adoption of a joint declaration suggesting direct negotiations between the Governments, Mr. Bridgeman walked up the stairs of the Hotel des Bergues. In whose hall-room the last act of the naval drama was played, to the private office of Mr. Gibson and shook his colleague warmly by the hand. This was hailed as an indication that the First Lord of the British Admiralty believed the

Ottawa. The net debt of the Dominion of Canada decreased \$52,498,429 during the first four months of the present fiscal year which opened on April 1. On March 31 last, the net debt totalled \$2,317,834,370. At the end of last month it had dropped to \$2,265,335,949. During the corresponding four months of the previous year there was a decrease in the net debt of \$11,271,055 or over eleven millions less than the decrease this far this year.

Ordinary revenue for the four months just ended amounted to \$15,735,358 against \$145,548,889 in the four month period of last year. This is an increase of \$2,186,462.

Custodian duties collected up to the end of July in the present fiscal year amounted to \$53,269,561. Last year the custodian collections for the four months was \$46,928,256. Excise duties collected also show an increase of \$2,375,552. In favor of the present year, when the two four month periods are compared. There was a decrease of some four millions in income tax collections. During the four month period which closed on July 31 last, income tax collections totalled \$14,281,514.

Increase In Tourist Traffic

Canadian Rockies Great Drawing Card Says Railway Official

Winnipeg. That tourist traffic this season was in excess of previous years, and that it has been coming to Canada from all parts of the world was stated here by T. E. Fisher, general passenger traffic manager of the Canadian Pacific Railway.

Mr. Fisher, who has just completed a tour of inspection of the company's famous summer resorts at Banff and Lake Louise, said that more people were visiting the Canadian Rockies than ever before, and that indications pointed to a steadily increasing traffic from year to year.

Mr. Fisher was optimistic with regard to conditions throughout the country and was of the opinion that business on the Pacific coast and on the prairies was such as to give cause for general satisfaction.

Report Is Denied

Ottawa. A report which has appeared in a portion of the press to the effect that Right Hon. Stanley Baldwin has accepted a lift of a motor car made especially for his use during his Canadian visit was emphatically denied by members of the British Premier's staff. There was said to be absolutely no foundation for the report.

Duchess Celebrates Birthday

London. August 4 was the 27th anniversary of the birth of the Duchess of York. Among the congratulations received by Her Royal Highness, were early cables from her brother-in-law, the Prince of Wales and Prince George, from Ottawa.

The E. P. Ranch

A Model Of Its Kind And An Example To Other Farmers

The Prince of Wales on his present visit to his ranch in Alberta, will find many improvements have been introduced since his last visit in 1924. The property, under the management of Prof. W. L. Carlyle, is beginning to make some return to its royal owner for the time he has spent in stocking and developing it.

It has always been the Prince's ambition to make his ranch, more than anything else, a model of its kind and an example for other farmers in the Dominion. The E. P. ranch extends over 6,000 acres, small as important ranches go, but it is high grade land and is home of the richest grain growing and stock raising regions to be found in Western Alberta.

The ranch house has been enlarged and otherwise improved since his Royal Highness last saw it. A new lounge hall and extra bedrooms have been added. The whole dwelling is simply furnished. A few comfortable lounge chairs, a well-tiled back porch, and one or two water-color pictures of neighboring beauty spots are the only appearance of "luxury."

Its sporting equipment, however, is very complete, and the Prince will be able to enjoy good sport when he comes. On his own property wild duck abound on one or two small lakes and on a tributary of the High Level that winds through the ranch and provides it with water. Mountain trout are numerous in this stream, some of them attaining considerable size, while not far away healthy chickens and partridges are to be found in flocks at certain seasons of the year. When bigger game is sought, the Prince has not much farther to ride before he enters across the trail of herds or wild deer that range over the foothills of the Rockies.

The ranch house is solidly built of brick. The front building is up-to-date in every respect and are placed in excellent shape facing the south. The view from the house, which is 2,000 feet above sea level, is picturesque and impressive, with the peaks of the Rockies in the distance seen over a vast intervening area of rolling prairie.

One of the Prince's first steps was to place on his ranch a herd of pure bred short-horn cattle, selected from his farm in Dartmoor, England. To this herd has been added some of the best strains of Canadian cattle, and these are all ready for breeding purposes.

The Prince later turned his attention to the raising of horses. The King presented his son with his thoroughbred "Whit Somers," and although this horse proved a disappointment on the turf, his value at stud has been considerable. The first stud of sturdy Dartmoor ponies that Western Canada has known was next established on the ranch, and there is a brisk demand for them.

Next to attract the Prince's attention were sheep. He brought some prize winning rams and ewes from the famous herd of the Duke of Westminster, principally Shropshire and Hampshire breeds. These have flourished so well on Canadian soil that many other farmers have established similar herds from stock established by the Prince.

A considerable area of the ranch is under tillage, so that the property is practically self-supporting, providing almost the whole of the fodder required for the horses, cattle and sheep. This area extends to about 200 acres, and oats and timothy seeds are principal crops. These provide winter feed, the ample grasslands offering all that is necessary during the summer months.

Fine Weather Made To Order

Fine weather may be made to order, just like any commodity, is the prediction of Sir Oliver Lodge, noted scientist. "The advance of science since the days when I was a student has been portentous," he said. "Sooner or later we shall be exercising control over the weather. I do not see why we should put up with bad weather if we do not want it."

Postage stamps, before being perforated, were cut apart with a sharp knife or scissors. In 1853 the British government bought the patent for perforating stamps from a man named Archer, paying him the equivalent of \$20,000.

"Well, Sam," asked the aviator, "how would you like a trip up among the clouds?" "No, sah," exclaimed Sam firmly. "I stays on terra firma, and de mo firmah de legs terrah."

The sweet young thing was saying her prayers. "Dear Lord," she cooed, "I don't ask for anything for myself, only give Mother a son-in-law."

W. N. D. 1923

Advice To Trappers

The Proper Way To Prepare Pelts For the Market

To those who have no wide knowledge of the trapping or skinning of animals there are many interesting facts to be disclosed. First of all, if the maximum of advantage is to be obtained, it is of the utmost importance to know the proper time for taking the animal in order that the pelt may be in what is known as "prime" condition.

If it could be possible to have every pelt taken in prime condition the value of the Canadian fur catch would each season be increased by millions of dollars, according to a report recently published by the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, copies of which may be secured without charge. More than half of the pelts of some species taken prove up prime on examination, and grade not higher than No. 2 in quality. There seems no reason to doubt, states the report, that if proper foresight and attention were given by individuals to their trapping enterprises, the pelts taken might be nearly 100 per cent prime. An experienced fur man can determine quite readily the season at which a pelt has been taken, by the appearance of the skin and overhair. When dried, a mink skin has a bluish appearance on the flesh side down the back and sides. When prime it has a creamy white color. It is desirable to capture fur-bearers when prime, because the fur and overhair are heavier and fuller, then and do not easily fall out. The pelts of most of the animals become prime some time about the end of November, although in a country so great in area as Canada, some variation may obtain.

The beauty of certain pelts is due largely to the overhair. It is long glossy silver-black overhair that gives the prime silver fox pelt its great superiority as a money getter over one that is rubbed or ungloved.

Methods of skinning, scraping, stretching, drying and shipping are fully described in the report which should prove to be a valuable little work of reference in these days of fur farming and amateur trapping.

That the fur companies themselves realize the economic importance to the industry of education in trapping and handling of the skins is evidenced by the fact that they have expressed a willingness to distribute the entire issue through their agents as they feel that the whole fur industry would benefit by a wide distribution of information along these lines.

The Chinchilla Rabbit

Cold, Dry Winters Of West Produce Thicker Fur

The adaptability of chinchilla rabbits to the Canadian climate has been amply proven. The cold, dry winters result in the production of a richer, thicker and more valuable fur than can be obtained in milder climates. A bulletin on rabbits distributed by the Publications Branch, Department of Agriculture, Ottawa, gives instruction for the raising of chinchilla and other rabbits and also gives in full the standard for registration of fancy chinchilla rabbits.

No rabbit since the days of the Belgian hare boom has created so much stir as has the chinchilla, and with very good reason, as it is one of the most beautiful rabbits in existence with a coat that immediately attracts attention. The feeding and care of these rabbits is not difficult and they are generally very healthy and not subject to any particular disease.

Germans Headed List

Germans headed the 1926 Immigration list, 5,623 persons of this nationality coming to Saskatchewan during the year. The British came next with 4,313. Among the other nationalities who appeared well up on the list were Magyar, 1,862; Rumanian, 1,295; Scandinavian, 1,005; Polish, 704; and Slovak, 427. In all 19,616 immigrants came to the province in 1926 of which 3,724 came by way of the United States. The total number was 7,469 greater than in 1925.

Heart Slower In Large Bodies

The bigger the body, the slower goes the heart beat. The elephant's heart beats only 25 times a minute; that of a donkey 50 times. The normal rate is 70 for men, 80 for women, 90 for youth, 140 for a new born babe, 150 for a rabbit, and 175 for a mouse. Activity speeds up the beating of the heart. If you remain quietly in bed for a day or two you will have saved 20,000 beats.

A London hotel keeper has finished his dining rooms in primrose and blue because these colors cause the diners to relax and be cheerful and hungry.

Predicts Speedier Aeroplanes

Might Reach Speed Of Thousand Miles An Hour Says Inventor

One of the aeroplane inventors has just spent before the world a vision of planes which will shoot through the upper air at a thousand miles an hour, so that a bustling passenger might leave New York after breakfast and lunch in Mccordly or the Rue de la Paix.

It is a breathless prospect, though placed people might prefer to save time some other way, but who shall say the prophet is too hopeful? He was one of the small band of inventors who at the birth of aeroplanes had the greatest difficulty in getting the heavier-than-air machines to flutter a few yards from the ground, had in less than twenty years have seen them surpass a speed of four miles a minute.

If a machine could be made to travel at such a speed the voyagers would have many strange experiences. They would have their own voices behind, and if the propellers were at the back of the machine they would escape the sound of the roar of them, for sound travels less than the hundred miles an hour, and the aeroplane would move too quickly to let the sound catch it up. A man travelling at that speed would be racing his voice!

But one doubts these things. Moving at such a speed, the machine would probably burn itself up, as meteors do. The voyagers might, perhaps, be enclosed in metal chambers, where they would neither be frozen or burned to death; but one is by no means certain that if the machine took an upward turn they might not fly out of the atmosphere altogether and become a permanent shooting star that could never get back.

A Noiseless Welder

Perhaps the most irritating of the many noises that the modern city produces is the ear-splitting racket of the pneumatic riveting machine. It is now proposed to substitute the comparatively noiseless process of welding the steel beam used in bridge and building construction. Welding has been successfully employed in several cases and proves to be cheaper as well as quieter.

Lady: "I want to buy a revolver. It's for my husband." Clerk: "Did he tell you what kind to buy?" Lady: "I should say not. He doesn't even know I'm going to shoot him yet."

Sees Europe By "Touch"

Blind Woman Has Just Returned From Year Abroad

Mrs. A. B. Adams, of Cleveland, has returned to New York after a year abroad. She did not see Europe. She heard and felt it. Mrs. Adams has been blind since infancy.

"While I came to a great city," said the woman who "saw" with her ears and fingers, "I got a guide. I challenge any one to describe the great murals of St. Peter's or the canvases of the Louvre better than myself. I saw them, just as people with their faculties of sight see them, because through my ear I stamped the image upon my brain."

Mrs. Adams, a pianist and singing teacher, can identify money, no matter what denomination or in what country, by touch. She proved aboard ship her keenness in purchasing objects by holding in favor of a teapot of flowered design rather than one of neutral brown.

She visited the big art museums of Germany, France and Italy, climbed the mountains of Switzerland, inspected Pompeii in Italy, studied the battle fields of France, entered into the Boulevard life of Paris, went to the Vatican library in Rome, the art galleries of Florence, the opera palaces of Milan and Rome and went from Paris to London in an airplane.

A Canadian Flag Inevitable

Canadian Sentiment Is Growing For A Distinctive Canadian Flag

A Conservative newspaper says that opposition to a Canadian flag will only involve an agitation fraught with dangerous possibilities, and that, therefore, the political leaders should agree on a design in which the Union Jack has its rightful place.

The advice is good, though it is not to be feared that the agitation will take a dangerous form. It would be more nearly correct to say that Canadian sentiment is so strong and growing that the coming of the distinctive Canadian flag is inevitable, and therefore that those whose chief concern is for Imperialism ought to keep in touch with the Canadian movement instead of opposing it. — Ottawa Citizen.

Salesman—How did you come to have the accident with that used car we sold you? Buyer—I couldn't put my hand out when I was pushing it around the corner.

There's only the difference of a name between begging and soliciting.

Ignore the "Small Clouds"

People Who Worry Over Petty Troubles Are Unwise

"The heavens are wide, why notice small clouds?" runs the quaint saying. When we come to think of it, we do spend a good deal of needless bother and worry on "small clouds." Someone makes an annoying or unkind remark at the breakfast table, but why notice it? A bit of wise silence, and the little cloud of petulance will have vanished in a clear sky. A small disappointment breaks a plan. Why waste hours and happiness in fretting over it when there are so many other interests, pleasures and occupations to take its place? Why make the day clouded and the heart heavy over the trifling failure or misfortune instead of putting it aside and going bravely forward? The great majority of our dark days are dark only because we insist upon fixing our attention upon the small clouds instead of upon the great wide blue of our blessings—the comforts, the hopes and the joys that are ours. The habit of ignoring petty troubles is one that can be turned into a rare gift, and the cost of acquiring it will be forgotten in the joy and peace its possession brings.

Poisonous In Native State

Tapoca Made From Root Which Contains Deadly Acid

Tapoca is known as a mild and delicate food, but in its native state it contains a poison so deadly as to kill within a few minutes the person who should eat the root of the bitter cassava, from which tapoca is made.

The poison found in the juice of the root is called hydrocyanic acid, and its flavor and odor is familiar to those who have eaten a bitter almond or the kernel of a peach pit, since both of these contain it in small quantities. This dangerous acid is easily driven away by heat.

The cassava plant, or manioc, as it also is called, is a native of South America and furnishes a staple food for the Indians there. There are two varieties, the bitter and the sweet. The latter is not poisonous and can be eaten raw or used as a fresh vegetable. But it is the bitter cassava that is more valuable, for it is from this one that tapoca is made from the starchy part of the roots.

In Defence Of The Flapper

Says Modern Girl Early Learns To Assume Responsibilities

Describing the fine work being accomplished by the Child Welfare Association of London, Ont., in reducing the infant mortality rate and insuring a healthy race of future citizens, Miss Martha Smith, supervising nurse of that organization, held the closest attention of the Rotary Club at a recent luncheon. Miss Smith took the occasion to defend the modern young flapper against the criticism levelled at her by declaring that these same young flappers, having assumed the responsibilities of motherhood at an early age, are just up-to-date in their efforts to learn all that they possibly can about child hygiene. They vie with each other, Miss Smith affirmed, in keeping their babies in the pink of condition by availing themselves of the splendid opportunities afforded them at the well-baby clinics.

England's "No Night" Period

Lasts From End Of May To Last Week In July

England experiences yearly what is called a "no night" period when the sun does not descend far enough below the horizon to cause real darkness. This period begins the last week in May and continues to the last week in July. In past years it has been found that the intensity of the midnight glow depends upon not only atmospheric conditions, but also upon whether the sun is in a comparatively restful or disturbed state. Under extremely favorable conditions, such as a long dry spell, with a cloudless sky and a dust-laden upper air, the glow occasionally has been remarkably bright.

Using Tasty Bait

The city visitor was supercilious and inquisitive. In the course of his meanderings he came upon a native fishing in a stream. The old fellow was gazing intently at an apple which dangled from the hook on his line.

The city man approached. "I say, old fellow, what are you doing there?"

"Fishing," said the native, without looking up.

"Well, what's the apple for?"

"Bait."

"Bait? Aren't you using a worm?"

"Yes."

"Well, where is it?"

"In the apple."

When some men lose money they employ a lawyer—and lose some more.

Man's Fight For Longer Life

Science and Sanitation Making Progress In Conquest Of Disease

Several months ago Dr. Charles H. Mayo said that man's age had been lengthened an average of only 5 years from the sixteenth century down to 1875; but has been increased an additional 13 years in the half century which has since elapsed. The average is now 58, as compared with 40, and according to Dr. John A. Kingsbury, the time is coming when it will exceed the "allotted span" of 70 years. Science and sanitation are making real progress in the conquest of disease.

It must be borne in mind, however, that forces are operating to reduce the span of life as well as those which are organized to increase it. The speed at which men live is sending them to the grave with hardened arteries. Artificial foods are adding to the difficulties of the situation. Machinery is taking its constant toll of life. Toronto is a city where the deaths from motor accidents do not approach the record of many American centres, yet automobiles killed 26 in Toronto during the first half of the present year—as many as died from typhoid, smallpox, measles, scarlet fever and whooping cough combined. And in addition to the machines which swoop down on man and injure him or destroy him, there are those others which lie in wait and seize or cut him if he goes too near their lair—the saws and bolts and cranes and myriad other devices that cannot be made fool-proof.

In thinking of the agencies which are prolonging life, it is therefore necessary to include safety. First propaganda with sanitation, surgery and medicine. The man who invents new safeguards for dangerous machines, or who educates the public to avoid dangers, is enrolled for the reduction of the nation's death rate just as surely as a man who works in a laboratory to discover new means of combating disease.—Toronto Star.

Motto Of the "Mounties"

Officers Always "Stand By Until Their Men Are Safe"

Lieut.-General Sir Archibald Macdonell, who took over the command of the Canadian division from General Currie during the Great War, told the following interesting story recently to illustrate the spirit of the Royal Northwest Mounted Police, of which he was a member for twenty years. During a tremendous barrage from the Germans on the Canadian front line trenches, Major Fane, formerly of the R.N.W.M.P., was very dangerously wounded. The men were carrying him out on a stretcher when he regained his senses. "Hold up," he said, "What is happening?"

"You have been dangerously wounded and we are carrying you to the rear," the bearer told him.

Major Fane was bleeding to death but he commanded, "Wait a moment or two. Give me a chance to think." Then he asked, "Were many of the men hurt?" "Yes," they answered. "Quite a few."

"How many," he asked, and on being told that there were twenty-eight of his men wounded, he commanded them to carry him to the communication trench and put down the stretcher there. "Now, he said, 'I will wait here until I can count twenty-eight stretchers carried by. The mounted police never go out until their men are safe.'"

Trained Settlers

"Where were you boys when I called for you to help me an hour ago?" asked Farmer Jones at the supper table.

"I was in the barn settin' a hen," said one.

"And I was in the left settin' a saw," answered another.

"I was in grandma's room settin' the clock," came from the third boy.

"You're a fine set!" remarked the farmer. "And where were you?" he asked turning to the youngest.

"I was on the doorstep settin' still!" was the reply.

Made Trip On Roller Skates

On roller skates a woman and her daughter left Kansas City, Missouri, and ended a 400 mile trip at Havana, Illinois. The actual distance covered on skates was 215 miles. In some towns they were barred from skating through, and several times they were forced to abandon their skates on account of dirt roads and bad weather.

"Imogene took umbrage at something I said."

"Well, that's all right, so long as she didn't get mad."—Judge.

"Did your husband appreciate the scarf I knitted for him?"

"Oh, yes, it came in most useful. It's gone and saved itself with it."

Daughters of Confederation Tour Canada

Probably no event of the recent Jubilee Celebration in Canada brought the Fathers of Confederation closer to the heart of this generation than the visit to Canada of Miss Hortense Cartier, daughter of one of the most illustrious founders of Canada, Sir George Etienne Cartier.

Miss Cartier arrived in Canada in June and, at the invitation of E. W. Beatty, President of the Canadian Pacific Railway, became a member of the University of Montreal party to tour the Dominion. Another distin-

guished guest of the President was Mrs. D. Chipman, a daughter of Sir Leonard Tilley. These two ladies, direct links with the men who made a union of the Canadian provinces, became the honored members of the university tour party during their journey to Vancouver, through the Canadian Rockies and return.

The accompanying photograph was taken at Winnipeg in front of the Cartier monument and shows Miss Cartier, at the right, and Mrs. Chipman, standing with the Hon. John Bracken, Premier of Manitoba.

It's gone and saved itself with it."

CHAPTER V.—Continued

Helmi sang as she did everything else, without the slightest trace of self-consciousness. She stood in the doorway with her hands behind her, and to the gray-haired ladies who listened she seemed like the embodiment of hope and youth and aspirations as she sang in her deep voice.

"Keep on singing when you've missed your crops,

Keep on dancing when the fiddle stops,

Keep on faithful when the curtain drops,

And you'll get there in the morning!

"Keep on trusting in the cause of right,

Keep on looking to the dawn of light,

Keep on fighting till you've won the fight,

And you'll get there in the morning."

CHAPTER VI.

Helmi's lessons went on. She could answer the telephone an explain in couched English that "Miss Moore is away," or "Would you please wait one minute," followed by "Thank you very much."

"A civil tongue, Helmi," Miss Moore had told her, "may not take you as far as a pretty face, but it will take you along a safer road."

Helmi lived for the days she had her lesson. In the atmosphere of elegance and beauty she felt herself expanding like a Japanese water flower. Even the smell of her friend's house was luxurious. Miss Moore's house smelled of soap, clean clothes, moth balls, and soap with onions in it, pleasant enough, too, in its common, roarse way, but the Doctor's house smelled Helmi could not find one word to describe it. She had noticed the same delicious odor in a shop in Helsinki before she sailed. It was of flowers in winter time, a

rich smell, with that impalpable hint of luxury which was so dear to Helmi's heart. Some days she rode in the car with her new friend, revelling in the soft gray plush cushions and the sparkling glass vase at the side, which the Doctor kept filled with fresh carnations. Even the floor of the car had a velvet carpet, and a light came in the roof by merely pushing a button! Helmi tried to write a letter home telling about it, but in the hard working world at home, with its meagre vocabulary, there were no words to tell of such magnificence. There was only one word to cover it all, and it was "big fish," and if she had written home the Finnish equivalent of that word, it would have misled people to think the car had sustained a bruise or had contracted mumps.

Helmi had to learn new words, for she was experiencing new thrills each day. Mrs. St. John took her once a week to the Moving Pictures Theatre, where Helmi sat spell-bound and dazzled. From the time she entered the enchanted place until she came out again into the sunshine she knew nothing of the real world. Watching the pictures she came up the aisle seeing no one, conscious of nothing, stumbling on the steps without knowing there was a step, or that she had stumbled, following her friend vaguely to a seat, and sitting perched on the edge until some indignant person behind her told her to sit down and let somebody else see, with an impatient "What is the matter with you, anyway?"

The world Helmi entered through the green plush doors, laid hold on her impressionable young heart. She saw lovely ladies in trailing beaded dresses and shining jewels, leaving their elegant homes to go with their lovers, and smart young stenographers wearing seal coats and hats they could clap on their heads and always look just grand, and who married the old man's wayward son and saved the old man's business from ruin by his lending at the door when the bad men were plotting. Then and there Helmi determined she would be a stenographer.

Sometimes when riding on a street car Helmi would pick out some weather-beaten old business man with wavy hair whom she believed might be her future employer. It became her delight to give up her seat to such, rather to their discomfort. She felt it only right that she should pay them this little attention. She wondered greatly about the sons of these men—so much would depend on the son.

After that her teacher could not keep enough words ahead of her. Helmi kept a list of words phoned over the slak while she washed dishes, and in between her moments of attending to the real business of dish-washing she practised her sentences:

The lady is beautiful.

She has an elegant coat.

Will you go for a drive?

Have a chocolate?

I adore chocolates.

Miss Moore, who tried to help on the good work of Canadianizing this young person who had come to our shores, wrote on her sheet:—

"Honesty is the best policy."

"Civility costs nothing."

"Evil communications corrupt good manners."

And these Helmi faithfully copied, but they left her cold. Indeed, she told herself in good Canadian that Miss Moore's sentences were dum-

Further attendance at the pictures brought home another fundamental truth—the lovely lady is always forgiven. Indeed, she can do no wrong. She may appear to do wrong, but someone else is really to blame. She found this to be true with the Doctor and his wife. The Doctor loved her even when she scolded him, pleaded with her when she pouted, laughed at her extravagance though pretending to be horrified, bore with all her moods and rages. Helmi knew it was because she was so beautiful. Everyone said the Doctor's wife was such a lovely lady.

No wonder Helmi now decided against stenography. She would be a lovely lady! And the words and sentences which appeared on the wall were thenceforth with this resolve.

Helmi was struggling with the lesson on the beaver, in the Third Reader. "He is an amphibious animal," she read, "living both on the land and in the water." She looked inquiringly at her teacher, whom she knew, without looking up, was regarding her intently.

"Pshaw, Helmi, a girl with eyes like yours doesn't need to know about amphibious animals. Close the book—that will do for today. I want to talk with you. Life is a dull place anyway—we have to take what thrills we can. I get a thrill out of you some way, you are so young and promising. Now, I am going to have a party. The Doctor is going East in a week. I have my parties when he is gone, because my parties and my friends bore him to tears. So we set the dates to suit. And besides his mother is coming to visit us soon, and I want something new. You're the newest thing I know, and so I want you at my party."

"I have no clothes," began Helmi, "for style party."

"Listen, Helmi, I have the clothes, closets full, and I know just how to dress you. You won't need to talk, so don't worry over your English. You'll be a young Finnish lady visiting Canada, the Prime Minister's niece, and my friends in Montreal asked me to look after you. Your father is a shipping broker, and you are on your way to Vancouver to join him. We'll fool them, and when they are all raving about you, and wanting to dance with you, in your delightful broken English you will beg them to excuse you—you are so tired. You will slip upstairs, change back into your maid's dress, and come down and help Manda to serve. Now, come and let me try on your clothes. You are going to be a symphony in green. Helmi—there's no color so dazzling as green. Mauve dreams, red raves, but green slings. You're to be a singing goddess."

Helmi's eyes were dancing at the thought of such a thrilling adventure, and when in the region of enchantment upstairs in Mrs. St. John's room, the walls of which were of pale green brocade satin, the hangings of the same, and the rugs so plushy green that they reminded her of the loveliest moss she had ever seen, she found herself looking into the glass at a beautiful girl in a creamy green clinging dress, silver slippers, jade earrings and necklace, a marvellous cloak a shade deeper than the dress, and lined with flame-colored satin that glimmered and shone. It was all just like a fairy story.

(To Be Continued)

World Reading Shakespeare

Library in England Has 20,000 Books in Different Languages

The Shakespeare Memorial Library at Birmingham, England, has nearly twenty thousand Shakespeare books, the largest collection in the world, and the library is a kind of index of the way Shakespeare is being read everywhere.

The demand for translations comes from all quarters of the globe and even in China they are reading Shakespeare increasingly.

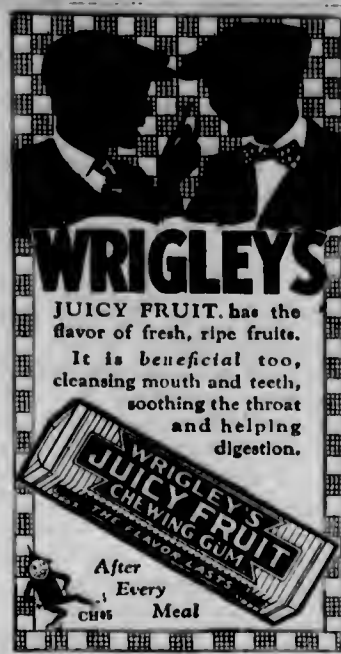

Every new edition and every new translation is represented in the Birmingham Library, and in the last twelve months three hundred and twenty-two new volumes were added in thirteen languages.

Strange House in India

The strangest house in the world is probably one in Jeypore, India. Besides its peculiar architectural appearance it boasts of being a huge musical instrument. When the wind is blowing it produces beautiful notes. The material used in the structure was a porous stone of very light weight. The wind playing upon the various openings acts as if upon reeds.

"Feyther," said little Mickey, "wasn't it Patrick Henry that said 'let us have peace'?" "Niver," said old Mickey. "Nobody by the name of Patrick Iver said anything like that."

It takes a very conscientious man to enjoy his work when the pay is small.

Aviator Had Narrow Escape

Frenchman Fell Headlong Nearly Four Miles Before Parachute Opened

After a headlong fall of nearly four miles through space, a French aviator, Jean van Laere, suffered merely from a rush of blood to his head caused by the dizzy drop.

Van Laere's parachute failed to open when he leaped from his plane at an altitude of 7,000 metres and remained shut until by some miraculous atmosphere shock it suddenly opened when he was 100 metres (about 329 feet) from the earth. The aviator's fall halted abruptly and he dropped gently down into a tree, in the forest of Caruelle, near Beaumont-sur-Oise, over which he had been flying.

Stunned by his long fall the aviator hung only half conscious in the branches of the tree for some time until he was discovered by members of the Forestry Service, who lowered him to the ground and carried him to their hut, where, after a couple of hours' rest, he regained lucidity and was able to give an account of his aerial adventure.

Van Laere was making a test flight from Villacoublay Flying Field. Flying over the field, he climbed to a height of 7,000 metres when his respirator for some reason stopped functioning.

While choking in his efforts to adjust the respirator, Van Laere said, he lost control of the plane and decided he would have to jump to save himself. He succeeded in leaping clear with the parachute, but when it failed to open he believed that he would be killed.

"I am astonished to find myself alive," said the aviator.

The plane was found totally demoralized and almost wholly buried under the ground a few hundred yards from the spot where the aviator landed.

Mioard's Lintment for scaly scalp.

Airplanes Outdo the Birds

Able to Make Much Longer Non-Stop Flights

Factory-made wings have eclipsed the feathered species. Lindbergh's non-stop flight was 3,610 miles. The distance flown by Chamberlin and Levins is estimated from 3,900 to 4,400 miles. The longest non-stop flights of birds have been those of Alaskan plovers from the Aleutian Islands to Hawaii, a distance of 2,400 miles, and the annual migrations of golden plovers from Newfoundland and Nova Scotia to the Looevar Islands and the northeastern coast of South America, a distance of 1,700 to 2,200 miles.

A Modern Scarecrow

Radio has been introduced as the newest farm implement by Gustav Schmitz, owner of a large orchard near Hornburg, California. Despairing of saving his valuable harvest of apples and pears from a cloud of voracious sparrows, he installed a loud speaker in the orchard, and, at the announcer's first words, the winged pests, fled, terrorized, never to return.

There is no objection to people's thinking what they like — just as their thinking isn't done out loud.

Hikers.

Take a bottle of Mioard's in your kit bag. Relieves sore feet.

Enlightened Red Men

Old Time Indian Chiefs Who Were Loyal To the Government

Western newspapers are liberal in their praise of Chief Thunderchild, who died on his reserve near Saskatoon a few days ago. He is said to have been the last of the old-time Chiefs, and as such signed one of the half-dozen treaties in the seventies by which the red man surrendered his pristine domain to the advancing whites.

Thunderchild illustrated how fortunate Canada has been in its relations with the aborigines. He was one of the Chiefs who refused to join Mel in the Rebellion of 1855, and remained loyal to the Government with which he had made a covenant a few years earlier. The organization of the Northwest Mounted Police in 1874 was a wise move by the Canadian Government, and the Indians soon learned the value of the force as a protecting agency for them.

Crowfoot, the wise Chief of the Blackfoot tribe, out near the foothills, expressed well the view of the enlightened Indian when he signed the Blackfoot Treaty in 1877. "If the police had not come to the country, where would we all be now?" he said. "Bad men and whiskey were killing us so fast that very few indeed of us would have been left today. The police have protected us as the feathers of a bird protect it from the frosts of winter."

Crowfoot, too, refused to join in the rebellion, and he welcomed the railway as the natural instrument of the white race which in the Canadian West had befriended the natives who had to give way to new conditions. — Toronto Globe.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Gold Reserve Well Protected

Underground Vaults in Bank Of England Are Burglar Proof

Although workmen engaged on the new underground vaults of the Bank of England, where all of Great Britain's gold reserve will rest, are guarded from prying eyes by armed policemen, some details have leaked out regarding what is said to be the world's hardest job of safe cracking.

Underneath the present bank are concrete walls fifty feet deep and seven feet eight inches thick. If somebody with felonious intentions were to tunnel through these he would come into a passage patrolled by guards and protected by every known alarm system around all four sides of the treasure.

Once in this passage way the cracksmen would have to cut through double grills of steel. The next step approaching the swag of several hundreds of millions of dollars in gold would be to cut through doors of solid steel weighing 24 tons each. This would take oxyacetylene drills, in the hands of experts at least three days. These doors can be swung with light pressure of one hand. If they are open. When they are locked it is different.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Expellant has proved a boon to suffering children everywhere. It seldom fails.

Something To Be Proud Of

Britain Holds Envious Place In Long Distance Flying

The British record in long distance flying is something to be proud of. We have to our credit the first conquest of the Atlantic both by airship and aeroplane, the long array of Empire flights by Sir Allan Cobham, and the magnificent non-stop attempt to India which synchronized with Colonel Lindbergh's Atlantic crossing. Yet to a great extent, because we are without the hair for self-assertion which is a conspicuous possession of some other nation, Britain's reputation abroad is tending to become that of an indifferent performer in the air, and pessimistic critics at home are talking and writing as if we had fallen into a position of hopeless inferiority.

A Clerical Error

A clergyman who had given up his former position as a justice of the peace in order to enter the pulpit was conducting his first marriage service.

"Do you take this man to be thy wedded husband?" he asked the bride.

The bride answered eagerly: "I do."

"And you," he continued, addressing the bridegroom, "what have you to say in your defense?"

RABBITS

Offered FREE by the Government

THESE two pamphlets, prepared from actual experience by Government experts, contain information of genuine value on any farm.

"Preserving Fruits and Vegetables in the Home" is a 46-page booklet particularly valuable at this time. It goes very thoroughly into every department of canning—fruits, vegetables, jams, jellies, pickles, etc. It discusses the various methods and makes many recommendations helpful towards better preserves and fewer spoilages. Contains 74 different recipes.

"Rabbits"—gives the real facts about this profitable farm side-line, mentioning particularly the popular Chinchilla. Explains the chances of money-making in meat and pets, detailing carefully the best methods of housing, feeding, breeding, marketing, curing diseases and choosing breeds.

Over 500 other pamphlets on farming subjects are available. Write for the 1927 list. Fill in and mail this slip post free to

Little Helps For This Week

Walk worthy of the Lord, unto all pleasing, being fruitful in every good work. — Col. 1. 10.

True worth is in being, not seeming, in doing each day that goes by. Some little good, not in dreaming, Of great things to do by and by. — Alice Cary.

Not what we think, but what we do, Makes saints of us. — Ibid.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Munaghan, Ont., says:—"We have three fine healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Only Woman Tea Taster

There is a woman who tastes no fewer than 300 samples of tea every day. She is Miss Margaret Irving, and she enjoys the distinction of being the only woman tea taster in Great Britain.

Mioard's Lintment for cuts and bruises.

Insured: Well, thank the Lord the car is finally paid for!

Wife: Isn't it splendid! Now we can turn it in on a new one.

It takes a good artist or a good actor to draw a good house

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, Melancon, Alta., writes: "Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute

Synopsis of the Particulars of a Proposed By-law of the Town of Magrath:

The by-law referred to in the appended notice ratifies and confirms an agreement between the Town of Magrath (herein called the Town) and Calgary Power Company Limited (herein called the Company) and authorises the execution thereof by the Town. The particulars of the said agreement, which are embodied in and made a part of the by-law, are as follows, the numbers being in accordance with the paragraph numbers therein.

1. The Town shall exercise its option for the purchase of the electric distribution system in the Town from the Crane-Cassidy Electric Company Limited for \$8500.00 and the Company shall purchase the said system from the Town at the same price which is to be paid upon the execution of the agreement.

2. Possession of the said distribution system is to be delivered to the Company upon the completion of its transmission line to the Town on or December 1st, 1927; until delivery the Town is entitled to operate the said system.

3. The Town is to provide a suitable site for the Company's substation.

4. The Town grants to the Company an exclusive franchise for ten (10) years from December 1st, 1927, for the distribution of electric energy in the Town with the right to use the streets and lanes of the Town for its distribution system.

5 and 6. Before extending or changing its distribution system plans for such work are to be submitted to and approved by the Town, and the Company is to do all such work in an efficient manner and to restore the Town streets.

7. From the date of the completion of the Company's transmission line to the Town the Company is to furnish a twenty-four hour service to the extent of the full requirements of the Town and the inhabitants and if the transmission line is not completed by December 1st the Company is to furnish a service equivalent to that now enjoyed from the existing generating system until the completion of the line.

8. The transmission line or source of supply of the electricity is to have sufficient capacity to supply continuously in the forms defined in the agreement the electricity required and demanded by the Town and in the event of the increase in demand the Company is to increase its capacity accordingly, such supply being subject only to interruption by inevitable accident or net of God or other matter beyond control of the Company.

9. The form in which the electricity is to be provided is defined.

10. The town may use the poles of the Company for Municipal purposes subject to certain conditions.

11. The Company is to repair and make good any damage to its plant or equipment as rapidly as possible for the purpose of minimizing interruption of service and consequent inconvenience to the Town and its inhabitants.

Each lamp not exceeding 250 candle power \$3.00 per month,
Each lamp not exceeding 400 candle power \$3.90 per month,
Each lamp not exceeding 600 candle power \$5.10 per month.
Provision is made for extensions and the number of street lights is not to be less than 35 at any time.

14. The rates to be charged by the Company are as follows.

FOR DOMESTIC SERVICE

Available only for lighting, heating, cooking, domestic power and other uses in houses and apartments used exclusively for residential purposes.

A service charge of 50c per month.
The first 30 kilowatt-hours per month—10c per kilowatt-hour,
The next 20 kilowatt-hours per month—10c for two kilowatt-hours,
All over 50 kilowatt-hours per month—10c for three kilowatt hours,
With a minimum charge, including the service charge, of \$2.00 net, \$2.30 gross, per month.

FOR COMMERCIAL SERVICE

Available only for premises other than those solely used for residential purposes.

A service charge of 50c per month for the first 500 watts of installed capacity and 20c per month for each additional 250 watts of installed capacity.
First 100 hours' use of installed capacity—10c per kilowatt-hour,
All over 100 hours' use of installed capacity—10c for two kilowatt hours,
With a minimum charge, including service charge, of \$2.00 net, \$2.30 gross per month.

FOR ALTERNATING CURRENT POWER SERVICE

Service charge \$1.00 per month per kilo volt ampere (K. V. A.) of installation (one K. V. A. to be considered equivalent to 1 motor horse power or 1 kilowatt in electrical heating apparatus)

First 100 kilowatt-hours per month per K.V.A. of installation—10c for two kilowatt hours,

All over 100 kilowatt-hours per month per K.V.A. of installation—10c for three kilowatt hours,

With a minimum, including service charge, of \$3.00 net, \$3.30 gross, per month.

The service charge to churches is to be in accordance with the domestic service rate but the charge for energy in accordance with the commercial service rates; a discount of 10% on the dollars of all accounts paid within ten days is to be allowed.

15. In the event of the company lowering its rates in other Towns or Villages South of Calgary with which it has made agreements for the distribution of electricity upon similar terms and rates a corresponding reduction is to be made in the rates to the Town.

16. Upon any increase in the water rentals or charges or taxes imposed on the Company the Company has the right at its option to make a commensurate increase in its rates for electricity.

17. The Company is to provide meters free of charge which are to be open for inspection by the Company and consumers at any time; the meters shall be tested by Government Official when required by any consumer and provision is made for adjusting accounts on account of inaccuracy of meters.

18 and 19. The Company is to

12. The Town is to be furnished with electricity at the same rates as other consumers.

13. The Company is to maintain and keep in repair and proper working order the street lighting system which it is acquiring from the Town, replacing lamps, is to furnish an all night street lighting service, maintaining all present street lamps and such additional lamps as the town may demand at the following rates:

unify the Town against damage arising by reason of any act or omission of the Company in the exercise of its powers under the agreement.

25. The Company is to observe all by laws of the Town applicable to it and its operations.

26. The rights of the Town may be exercised by the Council or any person authorized by the Council.

27. The agreement does not take effect until ratified by the rate payers under The Town Act and shall bear date as of the actual execution thereof by the Town.

28. The Company submits itself to the jurisdiction of the Public Utilities Board.

29. The Company is also subject to and bound by the provisions of the Dominion Water Power Act and The Dominion Lands Act and regulations pursuant thereto.

The agreement ensures to the benefit of and is binding upon the parties thereto and their respective successors and assigns.

TAKE NOTICE that the foregoing is a true synopsis of a proposed by-law which has been introduced and which will be finally passed by the Council of the Town of Magrath within four weeks from the assent of the burgesses of the said Town thereto and the votes of the burgesses or rate payers of the said Town for and against the said by-law will be taken on Friday the 2nd day of September A. D. 1927 at the Town Hall in the said Town of Magrath and that the poll will be open for such purpose between the hours of ten o'clock in the forenoon and seven o'clock in the afternoon and that I shall attend at the place aforesaid for the purpose of summing up the votes for and against the said by-law at the hour of seven o'clock in the afternoon of the said 2nd day of September A. D. 1927.

Dated this 4th day of August A. D. 1927.

J. T. Steele
Returning officer.

Sunshine Trail Report From Wood and Snow

O. H. Snow and T. Geo. Wood, delegates to the Sunshine Trail convention at Edmonton, with the purpose of securing the diversion of the trail at Craddock through Raymond, have reported to the Town Council. From opposition met in the Milk River representative and none too hearty support given by Lethbridge men, it is apparent that the battle is not hopeful.

The report submitted by Messrs. Snow and Wood ends with the following:

"Our position is that although there seems less chance now of making the change than appeared in April there is still hope that it can be done if sufficient argument and pressure can be brought to

bear on the Trail association and the Department of Public Works. We recommend therefore:

1. "That a written argument be presented to the Executive Committee of the Sunshine Trail Association with the request that their Committee actually travel over the two routes and that they place their recommendation on record with the Provincial Government.

2 "That a written request be sent to the Minister of Public Works asking for preliminary engineering survey of the alternative route from which he could determine the exact difference in cost.

3 "That we request Mr. Lawrence Peterson, M. L. A. for this District, to endorse by letter or otherwise the proposed re-routing."

News Notes

Mr. and Mrs. Lee Brewerton and Mr. and Mrs. Deal Mendenhall returned home last Tuesday from a visit to Salt Lake City. They were accompanied by Lee's sister, Mrs. Ann Hill, who left here 18 years ago. She will visit for a few weeks.

FOR SALE—A No. 12 De Laval cream separator in good order. Apply to Mrs. George Selman, Raymond.

The local U. F. W. A met at the School of Agriculture last Tuesday and heard lectures from Mrs. R. B. Gunn, J. A. Johanson and Mrs. T. Carlson. The visitors were guests of Mrs. Nell Fisher.

Reg. Gaddie has resigned his job with the local sugar factory and has accepted a position with the Gunnison Sugar company. He left here last Monday.

A. W. Kirkham left last Saturday on a buying trip to Vancouver in the interests of the Mercantile store.

Weed supervisor Young threw a bomb into the town's "inards" last Friday when he laid a complaint against Constable VanOrman, local weed inspector, for not obeying orders. Justices Bingham and Roberts decided in favor of the plaintiff and levied a fine on the town, through its agent, Mr. VanOrman, of \$5.00 and costs. The case hinged on a technicality that Mr. VanOrman and the town argued that he was only weed inspector for the town, not appointed under the act and was subject only to orders from the mayor and council. Their worships, however, decided otherwise.

Principal Longman is visiting Edmonton this week; on his return the student drive will commence in earnest.

Marcelling—On and after Aug. 15th. Marcell will be charged for at 50c, Henna Packs 75c, Henna Rinse 35c. Mrs. J. C. Tittsworth, Raymond.

For Sale—House and lot, 5 rooms outbuildings etc. location, corner of second south and first west streets. T. T. Mendenhall, I. Inquire at residence.

The first passenger trip of the Lethbridge Commercial Airways was made on August 7 between High River and Lethbridge by a plane piloted by Jock Palmer. It is announced that commercial flights will be arranged between Lethbridge and Waterton Lakes.

Wanted—Water Tank Pump and Hose. Also a Tent, 12 x 14.—Apply Louis Brandley, Raymond.

FOR SALE—Twin City Tractor, ready for work, burns kerosene or distillate. Handles 28—48 Separator. Terms to reliable party.—Apply Louis Brandley, Raymond.

The catch limit per day of cutthroat rainbow, Lock Even and Dolly Varden trout has been reduced to twenty according to new regulations for the provinces of Alberta and Saskatchewan. This limit applies also in the case of grayling and Rocky mountain whitefish, while the limit for other fish is as follows: Lake trout, 10; perch or goldeyes, 25; pike or pickerel 15; bass, 5. In the case of perch and goldeyes no one shall catch and retain more than 25 of either species or of both species than will in the aggregate number more than 25, the same regulation applying to pike and pickerel.

U. F. W. A. Had a Merry Time

Mrs. Nell Fisher was hostess to the U. F. W. A. last Thursday at her beautiful farm home east of Raymond.

The Literary lesson on E. Pauline Johnson or Tek-ah-ion wake her Indian name by which she wished so much to be known was conducted by Miss Gwendolyn Bryner assisted by Mrs. Relva B. Ross and Thelma Smith both of whom gave readings illustrating Miss Johnson's literary style.

Miss Lura Redd also gave a reading. After the program the ladies entertained themselves for a time exploring the farm and in social enjoyment.

The afternoon was concluded with a delicious lunch during which the guests were entertained not by "Sousa's Band" playing while we eat," but by a local Hungarian trio which played the old tunes with such exhilarating effect that some of the older women couldn't resist the temptation to "shake a wicked foot."

The guests numbering nearly seventy expressed their appreciation to the hostess for her hospitality and those who so generously used their cars to convey the guests.

Old Folks' Outing

The old folks were given an outing Tuesday Aug. 9th. They all gathered at the Opera House at 12 o'clock and about 35 or 40 cars took them to Henderson Park, where tables and seats were in readiness, and dinner was served. All enjoyed the feast immensely after the long drive. After dinner all enjoyed the beautiful park. Some went swimming, some swinging, some enjoyed the merry-go-round, some went boat-riding, others enjoyed walking in the shade visiting with friends and taking in the sights. All seemed in the best of spirits and had a good time while at the park. About 5:30 p. m. all were gathered again and were then taken to the experimental farm and were shown around to see the gardens of flowers, fruit trees and bushes, vegetables and grains. They are just wonderful and the beautiful lawns and trees and hedges too. It was a great treat and will long be remembered by all. And the committee is to be complimented on their great efforts in making every body happy and a success.—From one of the guests.

S. of A. News

The School of Agriculture up to the present time has enrolled 41 students, of this number 31 are 2nd year students 15 girls and 16 boys while 10 first year students have enrolled, 7 girls and 3 boys.

The prospects are that there will be a class of over 50 Sophomores and while the new student enrolment has barely started it is anticipated that it will cross the 100 mark.

Last Friday August 12, the R. S. A. held their annual reunion. The program consisted of a tour of the gardens and plots, games etc. a get-together luncheon at 7:30 and dance in the evening.

After the conclusion of the lunch an alumni association was organized. The officers for the coming year are to be as follows: Hon. President O. S. Longman, President, Paul Dahl, Vice President, Delvoir Meldrum, Sec-Treasurer, Chas. Asplund.
